MEDICO ENGINEER

MEDICO ENGINEER

Your Free MDCAT Companion

Serving MDCAT students for 4 years — completely free of cost

Prepare smarter with trusted, high-quality MDCAT resources designed to help students practice, revise, and improve confidently.

We Provide

Free High-Quality Practice Tests

Chapter-wise and topic-wise MDCAT practice tests for strong exam preparation.

MDCAT Books

Useful books and study resources for Biology, Chemistry, Physics, English, and Logical Reasoning.

MDCAT Material

Organized MDCAT preparation material for students.

Notes & Revision Guides

Easy notes for quick revision and concept clarity.

Top Academies Material

Selected material from well-known academies to support your MDCAT preparation.

PHYSICS

1.Which one of the following is result of centripetal acceleration in a body?
Ans: change in direction.

2.The momentum of P (Photon) written by
Ans: P=MC

3. The particle whose mass is equal to electron is
Ans: Positron

4. X-ray is highly electric wave. With short wave length. The nature of X-ray is?
Ans: Electromagnetic

5.The range of projectile motion of its maximum value. The range projection is
Ans: 30 degree

6.The product of frequency and wavelength of a wave is equal to?
Ans: Speed of Wave.

7. Jet plain engine develops thrust 400N and flying speed 200m/s, the power of engine is
Ans: 8x10 w

8. Weight lift consumed 1000J of energy to lift load in 2 seconds, the power consume is &
Ans: 500W

9. Body moves in circular path may have constant?
Ans: Speed

10.The object is moving faster than speed of sound?

11.Helicopter with weight W ascending with Zero (0) acceleration upward force on helicopter is
Ans: F=W

12.A body falls from certain height and falls freely, its speed after 1 second will be?
Ans. 9.8m/s

13.How long it takes body moving with speed of 30m/s to stop, it decelerates at 5m/s2
Ans: Six (6) seconds

14.Two perpendicular forces of same magnitude (F) are meeting at a point. The

Medicoengineer.com

CamScanner

resultant force
Ans: Under score 2F or /2F
Ans: Supersonic

17.The speed of wave in medium 760s to 3600J passing through the medium in 2 minutes
Ans: 25.3m/s

18.The sound speed at 0* is 332 m/s, the speed of sound at 100°C will be?
Ans: 388m/s

19.The electric field intensity inside the spherical surface is:
Ans: Zero

20.The Capacitor of 5F, 7F connected in parallel. Each of equivalent capacitance is?
Ans: 12F

21. 12J work done charge on 0.1 between two points against electric field. The potential difference b/w two point will be
Ans: 120volt

22.The charge of magnet is 3UF and displaced at 20cm and equapottential surfaces. The required amount of work done is:
Ans: Zero

23: which of the following is correct relationship?
Ans: E=Eo Er

24: In parallel plate capacitor, If area of the capacitor will doubled the capacitance will be:
Ans. Doubled

25: In electric field electron is places between two parallel plates and separation is 0.5cm and potential difference is 60volt. Force of electron
Ans: 1.9×10^{-15} J

26.If Pt and Po shows resistivity. toC and 0o C their relationship is
Ans Pt= Po (t x ΔT)

27.The electromotive force measured in
Ans: Volt

28.The reciprocal of resistance is
Ans: Conductance

Medicoengineer.com

CamScanner

20.Two wires of Iron and Copper. How we will make the same resistance of two wire?
Ans: Cross sectional different

30: An electron cattle of 100 watt boils certain quantity of water in 8 minutes generates
Ans 4.8×10^{6} J

31.Which of the following is not scalar quantity?
Ans: Magnetic flux density

32.The change in internal energy in isothermal process
Ans: Zero

33.The area under adiabetic process(P – V) is:
Ans: Work Done

34. In Thermodynamic process an internal energy of system decrease by 300 J and 120J work done on the system is Ans:-420J

35.The energy of light determined by:
Ans: Frequency

36.The is the time of the rate of linear Momentum is
Ans: Force

37.A moving isolated charge particle around having:
Ans: Both Electric and magnetic field

38.The unit of self conductance?
Ans: Henry

39.In step down transformer
Ans: Np > Ns

40.When north pole of magnetic bar approaches at faced at the closed coil
Ans: North pole

41.The direction of induced EMF is predicted by?
Ans: Lein's law

42.The elements of Group IV can be converted into semiconductor
Ans: by addingh impurities of Group III

43.The semiconductor the major carriers are

Medicoengineer.com

CamScanner

Ans. Electrons

44.In angular momentum, electron is
Ans. MVR-nh/2pi - mvr = nh / 2pi

45.The product of half life and decay?
Ans. 0.693m

BIOLOGY

50.The rate of blood flow in human body can be traced by?
Ans. $_{11}Na^{24}$

51.The high energy duotrim absorbed by 3Li6 produced.
Ans: Two alpha particles

52: The skin cancer of human?
Ans: Kaposi Carcinoma/Sarcoma

53: Which of the following is not essential for photosynthesis:
Ans: Oxygen

54.Energy required for
Ans: Active process

55.Net Gain of ATP in electron transport chain to
Ans: 36 ATPS

56. Chromosome with one long arm and one short arm is:
Ans: Acrocentric

57.The cell membrane intake material, process is:
Ans Endocytosis

58.The histological branch?
Ans: Viscum

59. Force pushes water from room to stem is?
Ans: Root pressure

60.Bacteria grow rapidly in which phase?
Ans: Log phase

61.The scientific name of ladder wort is
Ans: Ultricalaria

Medicoengineer.com

CamScanner

62: Light which inhibit the germination of laticulus seed
As: Far Red Light

63: Microorganism germinate into
Ans: Make gametophyte

64 Diagramatic representation of tropical plant is
Ans: Pyramid

65: Protein Tubulin is
Ans: Present in Microtubules.

66: Lysosomal enzyme in which liver and spleen is enlarged
Ans: Gaucher Disease

67: Process by which structure absorb liquid but swells volume does not dissolve is called
Ans: Imbibition

68: The casperin strip waxy belt found in
Ans: Endodermal cells

69: In which deficient soil carnivorus plant typically lives.
Ans: Nitrogen

70: Colour of leaf turns into bluish green due to deficiency of
Ans: Pottasium (K)

71: A chemical produced by certain microorganism to kill or inhibit others
Ans: Antibiotic

72: Cocci arranged in group of Eight (8)?
Ans: Sarcina

73: Type of sexual reproduction in which morphological similar but physically different dissimilar fused to form?
Ans: Anisogamy

74: The growth in apex of young stem take place in zigzag manner
Ans: Nutritional/Nutritive moment

75: Particular area of chromosome
Ans: Karyotype/ Karyotyping

Mediconeengineer.com

CamScanner

76: Response of plant to relation with day and night?
Ans: Photoperedism or Photoperdum

77 Most Abundant WBCs
Ans Neutrophills

78: which helps to prevent change in pH?
Ans: Buffer

79: Xantophyills and carotenes are?
Ans: Carotenoids

80: which carry information from nucleus to Ribosomes?
Ans: mRNA

81: Enzyme which act as same cells?
Ans: Endoenzyme

82: Volume of blood pumped by left ventricle per minute is
Ans: Cardiac Output

83: Tripsinogen to active tripsin by enzyme?
Ans Amylase or Enterokinase

84: Accumulation of small changes through successive generation promote development of new organ or character transfer into offspring next generation?
Ans: Inheritance of acquired character

85: All species are not same totally. Varriation are inherited according to?
Ans: Charles Darwin

86: The Troponema Pallidium is which of the following?
Ans: Spirocheatae

87: Reflex which involve sensory and motor neuron is?
Ans: Reflex arc

88: Spicules of sponges are
Ans: Calcarius

89: The occurrence of species intro two or more structurely and functional different zooids?
Ans: Polymorphism

90: Synthesis of mRNA is?
Ans: Transcription

Mediconginee

CamScanner

91: Energy rich molecule is
Ans: ATP

92: The impulse where impulse moev from one to another is called
Ans: synapses

93: Cells of nervous system are?
Ans: Neurons

94: Sound, Touch pressure and motion is detected by?
Ans: Mechanoreceptor

95: Activity if every enzyme is regulated by?
Ans Feed back Inhibition

95: Intraspecific structural
Ans: Same species

96: Similar organs have tend to modify functions and different species?
Ans: Homologous organisms

97: Gonorrhea caused by?
Ans N- Gonorrhea

98: HIV is vires, destroyes
Ans: Immune system

99: Denaturation of cartilage due to deposition of calcium,
Ans: Arthritis

100: Ankle bones are
Ans: Metatarsals

101.Heart surrounded by?
Ans Pericardium

102. Over genitals, Painful ulcer blisters caused by?
Ans: Herpes Simplex

103:Sperms stored in long thin 6m tube?
Ans Epidydmis

104: Cartilage formed by which cells?
And Chondrocytes

Medicoengineer.com

CamScanner

105: which regions have greatest no. of sensory receptor?
Ans Tongue and Finger tips

106: Presynaptic membrane vesicles have?
Ans Neurotransmitter.

107: The largest organ is
Ans Liver

108: Myosin filament surrounded by?
Ans G actin filament

109: Children having blood group A-B-AB-O
Ans One present gave heterogenous A and One present having heterogenous B

110: Trachioids having spindle shape given by?
Ans. Oblique transfer wall

111: First barrier to pathogen?
Ans. Epidermis

112: Transmition of Hep B and Hep C
Ans Through contaminated Blood and Blood products

113: Pyruvate convert to 3 carbon molecules is called
Ans: Kreb's cycle.

CHEMISTRY

109: Electrons revolve around nucleus and situated at fixed distance from nucleus with definite energy. it is statement of?
Ans Neil Bohr

110: wave which has highest penetrating power?
Ans Gamma Waves

111: Typical monocot seed does not have?
Ans spathes

112: producing sound organ (pair of vocal cords)
Ans Larynx

113: Conversion of straight to branched chain?
Ans Reforming

Medicoengineer.com

CamScanner

114: The Petrol (Gasoline) is mixture of?
Ans Hexane and Heptane

115: Acetylene is passing through red hot tube in presence of
Ans Uncatalyst Benzene

116: Methanol is called
Ans Wood Sprit

117: which is used as ink preservative?
Ans. Phenol

118: Positive charged oxygen bounded with free other atoms or groups of atoms
Ans Oxinium lon

119: Diffusion of gas is inversely proportional to square root of density at constant temperature and pressure?
Ans Grahams Law

120: used in TVs and computers?
Ans Plasma

121: Free falling drops of water?
Ans Surface Tension

122: which of the following having characters of malleability, ductility, electrical and thermal conductivity?
Ans Metallic Solids

123: What happens to Kc when catalyst is added to chemical system equilibrium.
Ans It become zero

124:outer body of dry cell
Ans: Zinc

125: Process occurs at anode?
Ans Oxidation

126: Dipole moment of CS2 is
Ans.. 0.00

127: trigonal pyramidal shape?
Ans NH3

128: in first law of thermodynamics, initial and final state depends upon?

Medicoengineer.com

CamScanner

Ans Energy (E)

129: Chemical reaction NHO2-→ NO2, the order of reaction is?
Ans 2nd order

130: General gas equation is combination of?
Ans Boyle's and Charles Law

131: smallest repeating pattern on which lattice is built?
Ans Unit Cells

132: Kc is
Ans Equilibrium Constant

133: 2HI------H2+I2 is
Ans 2nd order Reaction

134: In reaction A→B, rate of disapperence is
Ans-dA/dt?

135: At ordinary condition, Formealdehyde is?
Ans. Gas

136: The molecular weight of water soluble protein is?
Ans High

137: At equilibrium,
Ans. Rate of Forward reaction is equal to rate of backward reaction

138 Fat soluble vitamins are?
Ans. A, D, E and K

139: Maximum amount of product is obtained by balance chemical reaction by using
Ans: Theorical yield

140: Percentage of 02 in water?
Ans 88.88%

141: Limiting reaction is one which produce?
Ans. Minimum number of mole products

142: Nucleophile is a
Ans Electron Rich Species

143: At highest Temperature, the gas exits in liquid is called?

Medicoengineer.com

CamScanner

Ans Critical temperature

144: Elimination reaction n which only substrate involve in rate determination step?
Ans. Unimolecular.

145: Tollen reagent is prepared by adding drops of NaOH + AgNO3 to white precipitates?
Ans. AgOH

146: Dry distillation of Calcium acetate produces
Ans Acetone

147: The number 75300 is written as
Ans 7.5×10^4

148: Xray discovered by W. Rhenogen

149: Elimination is extracted through
Ans Bauxite

150Electrically refining copper is
Ans 100% pure

151: Stainless Stell is alloy of
Ans. Fe, Cr, Ni

152 in the orbital of atom, no two electrons can have same set of quantum number?
Ans. Paul's exculisive principle

153:Cracking is employed by increasing quantities of pertrol form?
Ans Crude Oil

154: A reaction in which two molecules combine and yield single molecule
Ans Addition reaction

155: Benzene was first isolated by Faraday
Ans Hofman

156:Fuming Sulphuric acid at room temperature reacts with benzene to produce?
Ans Benzen Sulphonic Acid.

157:Replacement of one or more hydrogen atoms of methane with halogen is?
Ans Halogenation.

158:P block Contains
Ans. Metals and Non-Metals

Mediocengineer.com

CamScanner

159: Viscosity is measure of
Ans Resistance in flow of liquid

160:Shape of diamond?
Ans tetrahedral

ENGLISH

1: Locious Neighbour?
Ans Talkative

2: Correct Option
Ans Will get

3.Correct sentence?
Ans. Eman said "what a beautiful house it is!".

4: Ans Kinza said "How long_____?

5: Cleaning staff_____area to prevent spread of corona virus?
Ans. Demolised

6: Identify the error?
Ans In trust me with work and it is done effectively.

7: This is literally thinkless staff. I will never take it again

8: Shopkepper told the boy that is he did not take himself off would call of police

9: Change into simple past?
She is a beautiful women
Ans She was a beautiful women

10: What type of sentence is this?
What are doing here Ali. I have not seen you since June.
Ans. Interogative

11. Shery is Coming FROM Japan

12. My friend lives at Saddar IN Karachi

13:Choose correct one?
Ans: Gawadar coastlike nation teasure the longest in the region

Good luck
