MEDICO ENGINEER

MEDICO ENGINEER

Your Free MDCAT Companion

Serving MDCAT students for 4 years — completely free of cost

Prepare smarter with trusted, high-quality MDCAT resources designed to help students practice, revise, and improve confidently.

We Provide

Free High-Quality Practice Tests

Chapter-wise and topic-wise MDCAT practice tests for strong exam preparation.

MDCAT Books

Useful books and study resources for Biology, Chemistry, Physics, English, and Logical Reasoning.

MDCAT Material

Organized MDCAT preparation material for students.

Notes & Revision Guides

Easy notes for quick revision and concept clarity.

Top Academies Material

Selected material from well-known academies to support your MDCAT preparation.

BIOLOGY

1. Which one of the following is a voluntary muscle?
A. Bicep
B. Cardiac
C. Stomach
D. Choice 4

2. Which one of the following plants store water in their parenchymatus cells?
A. Succulent plants
B. Angiosperms plants
C. Gymnosperms plants
D. Xerophytic plants

3. Which type of respiration is the most effective in frog?
A. Cutaneous
B. Lungs
C. Pulmocutaneous
D. Through gills

4. All of the following are symptoms of hepatitis EXCEPT:
A. Deficit immunity
B. Enlargement of liver
C. Fever and fatigue
D. Choice 4

5. O Group is universal donor BECAUSE:
A. It has both A and B antigens
B. No Antigen
C. A Antigen
D. B Antigen

6. Most of the fruits belong to family:
A. Poaceeae
B. Fabaceae
C. Roseace
D. Solanacea

7. Oxyen reacts with RuBP in the absence of CO2 to form:
A. PGA
B. PGA and Phosphoglycerate
C. Oxaloacetate
D. ATP

8. Amoeba is :
A. A-cellular
B. Prokaryote
C. Multinucleated
D. None of the above

9. Ring worm is caused by:
A. Bacteria
B. Virus
C. Neutrophils
D. Fungus

10. The phytohormone responsible Fruit development, bud sprouting, development of pollen tube and parthenocarpy is:
A. Auxin
B. Gibberellin
C. Cytokinin
D. Thallomycin

11. Which protozoan class is totally parasite?
A. Protozoa
B. Plasmodium
C. Ciliata
D. Sporozoa

12. Which structure in bacteria composed of polysaccharides and amino acids that prevent bacteria from antibiotics and increases its pathogenicity?
A. Flagella
B. Capsule
C. Cell membrane
D. Cytoskeleton

13. Opening and closing of stomata is controlled by which of following taking place in the guard cells?
A. Turbidity
B. Turgidity
C. Flaccidity
D. Turgor pressure

14. Guanine always pairs with:
A. Thymine
B. Adenine
C. Cytosine
D. Uracil

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000–2023
For Study Material Visit: Medicoengineer.com

15. Formation of mRNA from DNA is called:
A. Translation
B. Transcription
C. Genetics
D. Mutation

16. In sickle cell anemia:
A. Valine is replaced by glutamic acid
B. Glutamic acid is replaced by Valine
C. Glutamic acid is replaced by Adenine
D. B-chain is replaced by Valine

17. Photosynthetic bacteria use which of the following instead of water?
A. H2S
B. H2SO4
C. H2 Gas
D. Atomic hydrogen

18. Which of the following is a bacterial disease?
A. Leishmaniasis
B. Tetanus
C. Measles
D. Polio

19. In vitro fertilization is:
A. Fertilization of egg outside the body in the laboratory
B. Fertilization within the female
C. Fertilization in water exclusively
D. Giving nutrition to fertilized egg

20. Which statement about fungi is not true?
A. They have Cellulose
B. They are heterotrophs
C. They have starch
D. They are coenocytic

21. In AMYLOPECTIN the linkage is:
A. 1,3
B. 1,6
C. 2,6
D. 6,6

22. Formation of annual ring is the result of the activity of:
A. Cork cambium
B. Cork cambium and vascular cambium
C. Intercalary maristem
D. Lateral cambium

23. Following are the characteristics of arteries EXCEPT:
A. They are deep
B. They don't have valves
C. They have narrow lumen
D. They are thin walled

24. Forgetfulness, loss of memory and losing the track of even most familiar places are the progressive characteristics of which disease?
A. Huntington's disease
B. Parkinson's disease
C. Alzheimer's disease
D. Caposi's sarcoma

25. Nitrogen is the ultimate product of:
A. Fats
B. Carbohydrates
C. Proteins
D. Organic salts

26. Club mosses belong to the sub-division:
A. Soermopsida
B. Pteropsida
C. Lycopsida
D. Psilopsida

27. Which one of the following undergoes complete metamorphosis?
A. Grasshopper
B. Butterfly
C. Crab
D. Scorpion

28. The TMV first appeared on the leaves of Tobacco plant and was characterized by:
A. Wrinkling of leaves
B. Yellow patches on the lamina surface
C. Falling off of the leaves
D. Transmission from one organism to another

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000-2023

29. Poikilotherms are the animals:
A. Whose arteries contract in cold temperature
B. Who have lot of stored body fats
C. Who maintain their body temperature constant
D. Hibernate during winter

30. Skin color, Height, and Intelligence vary in different peoples due to:
A. Pleiotropy
B. Epistasis
C. Polygenic inheritance
D. Crossing over

CHEMISTRY

31. How many carbons are there in STEARIC ACID?
A. 15
B. 18
C. 05
D. 07

32. What will be the product of specific heat and molecular formula?
A. Molar specific heat
B. Molar mass
C. Heat capacity
D. Molar heat

33. Which one is different from the others?
A. Propane
B. Benzene
C. Ethane
D. Methane

34. Dilute CO2 is used in cure of:
A. H2SO4
B. NaOH
C. KOH
D. H2S poisoning

35. Who observed radioactivity first?
A. Henry becquerel
B. Rutherford
C. Newton
D. Bohr

36. Unit of specific Rate constant for zero order reaction is:
A. 1/s
B. Mol/$dm^3.s^2$
C. dm^6
D. $Mlo^2/dm^6.s$

37. Which rule is violated in this $1s^2, 2s^2, 2p^6, 3p^6, 4s^2$
A. Aufbau's principle
B. Hund's Rule
C. n+l Rule
D. Pauli's exclusion principle

38. Atoms of sulphur and oxygen are held in a thionate molecule by:
A. Ionic bond
B. Covalent bond
C. Dative bond
D. Polar bond

39. How many lone pairs are present in H2O?
A. 2
B. 4
C. 1
D. 3

40. How many carbon atoms are in Valaric acid?
A. 7
B. 5
C. 6
D. 11

41. Pyrex glass is also called:
A. Borosilicate
B. Potassium silicate
C. Calcium silicate
D. Sodium silicate

42. On oxidation with KMnO4, ethane DOES NOT form which of the following?
A. Formic acid
B. Oxalic acid
C. Glycol
D. CO2

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000-2023

43. Rate of reaction depends on what in SN2 reaction?
A. R=k[R-X][Nu-]
B. R=k[R-X]²
C. R=K[Nu-]
D. R=K[Nu-][R-X]

44. Which of the following compounds dissociates more rapidly?
A. Chloroacetic acid
B. Formic acid
C. HCl
D. Ether

45. In Triads what would be the mass of Bromine according to the law of triads (Cl=35.5 and I=126.5)?
A. 81 a.m.u
B. 90 a.m.u
C. 79 a.m.u
D. 82 a.m.u

46. Enzymes are completely destroyed at which temperature?
A. 37°C
B. 98.6°F
C. 102°C
D. 100°C

47. Modern periodic law is based on what?
A. No. protons and neutrons
B. No. electrons
C. Mass no.
D. Charge density

48. The s-s b9md is weaker than s-p or p-p because:
A. Radius is s-orbit is short
B. Radial distribution of charge in s-orbital
C. Distribution of the charge at the axis
D. Distribution of charges at the nodal plane

49. Hess's law is specially applied in the process?
A. To find out the heat of formation
B. To find out the specific heat of formation
C. To find out total heat involved in the process where it cannot directly be calculated
D. To determine the rate of reaction

50. Because of splitting of H2O molecules in our body; which of the following structures may be affected?
A. Minerals
B. Carbohydrates
C. Proteins
D. Fats

51. 80 gm oxygen occupies the volume of:
A. 55dm³
B. 20dm³
C. 58.5dm³
D. 22.4dm³

52. NH3 dissolved in water will act as:
A. Proton acceptor
B. Proton donor
C. Electron donor
D. Both proton acceptor and electron donor

53. An electron can use excitation energy in the form of all of the following EXCEPT:
A. Photochemistry
B. Fluorescence
C. Heat
D. Radiation

54. Zn has only one oxidation state because:
A. Completely filled 4d-orbital
B. Half filled 4s-orbital
C. Completely filled 3d-orbital
D. Half filled 3s-orbital

55. The energy that the reactants should gain in order to enter into reacting phase is called?
A. Minimum energy
B. Activation energy
C. Threshold frequency
D. Kinetic energy

56. In the preparation of NaOH which of the following element is involved?
A. Fe
B. Pb

MDCAT Past Papers BY PRESTIGIOUS TESTING SERVICE 2000-2023

C. Hg
D. Se

57. Urea was prepared in the laboratory by Wohler first time in
A. 1918
B. 1928
C. 1938
D. 1948

58. Product of specific heat and molecular formula is:
A. Molar specific heat
B. Molar heat
C. Heat capacity
D. Specific heat capacity

59. $N_2+O_2 \rightarrow 2N$; Heat=+ve the yield of NO_2 can be increased in this reaction by:
A. Increasing the pressure
B. Increasing the temperature
C. Decreasing the temperature
D. Decreasing the pressure

60. Primary Alkyl Halides undergo E2 reactions in :
A. Polar solvent
B. Non-polar solvents
C. Electrolytic solutions
D. Polar and non polar solutions

PHYSICS

61. A.B = B.A is according to which property?
A. Closure property of multiplication
B. Commutative property of multiplication
C. Distributive property of multiplication
D. Associative property of multiplication

62. A current that flows from high concentration to towards a low concentration of the charge is called:
A. Conventional current
B. Electric current
C. Fluctuating current
D. Alternating current

63. A massive ball collides with a light ball, what will be the velocity of heavy ball after collision.
A. Doubled
B. Halved
C. It will remain stationary
D. Lighter ball will rebound with double velocity

64. A current of 3A is passing through galvanometer. If a high resistance is connected in series to it, the total current that will pass through the resistance will be
A. 6A
B. 15A
C. 3A
D. 2A

65. In x-ray production L,M,N come into K; the rays formed are:
A. Lα, Lβ, Lγ
B. Mα,Mβ,Mγ
C. Nα, Nβ, Nγ
D. Kα, Kβ, Kγ

66. If an image is formed at a distance of 24cm and is 4times magnified than actual object, the object must have been placed at a distance of:
A. 12cm
B. 6cm
C. 24cm
D. 18cm

67. Relation between visual angle and apparent size is:
A. Inversely proportional
B. Directly proportional
C. Proportional to its square
D. Proportional to the square root

68. Diffraction grating is used to study:
A. Newton's Rings
B. Polarization effect
C. Interference
D. Diffraction

69. Standing waves frequency in a pipe in which one side is closed and the other

MDCAT Past Papers PU PROFESSIONAL TESTING SERVICE 2000-2023

side is opened is the:
A. Even multiples of ½vL
B. Odd multiples of ½vL
C. Even multiples of ¼vL
D. Odd multiples of ¼Vl

70. If the radius of Earth is halved, keeping its mass constant, then the value of 'g' will become:
A. ½g
B. 2g
C. g
D. ¼g

71. The unit of momentum is:
A. N.s
B. N.m
C. N/s
D. N.m²

72. If the net torque acting on a body is zero, then which quantity remains constant?
A. Angular momentum
B. Linear momentum
C. 1st condition of equilibrium
D. 2nd condition of equilibrium

73. The corresponding frequency of 'n' loops is given by:
A. nf1
B. v/2L
C. f/2L
D. vf/2L

74. A ball is moving on the table; which energy does it posse:
A. Potential energy
B. Kinetic energy
C. Both potential and Kinetic
D. None

75. Find the dimension of C in $s=c/t^3$
A. $[I/T^3]$
B. $[L/T^3]$
C. LT^2
D. $[LT^3]$

76. If a body is immersed into water, the weight of body becomes equal to:
A. Weight of water displaced by body
B. Weight of body — acceleration due to gravity
C. Weight of body
D. Mass of body

77. A ball thrown upward with a velocity of 19.6m/s. The ball will come momentarily in rest after:
A. 2s
B. 3.5s
C. 2.8s
D. 0

78. Potential energy of an electron of mass 'm' moving with a velocity 'v' in a radius of 'r' is:
A. $-mv/r$
B. $-Ze^2/r$
C. mv^2/r
D. mZe^2/r

79. If a body is moving with uniform velocity in the direction of curling of fingers of the right hand, then the thumb will point at:
A. Angular velocity
B. Tangential velocity
C. Angular acceleration
D. Linear velocity

80. If a spring is pulled in right direction, the force that will cause the spring to move further in left direction, after passing through the mean position will be:
A. Elastic restoring force
B. Applied force
C. Inertial force
D. Gravitational force

81. Which device produces electromagnetic waves?
A. Rectifier
B. Oscillator
C. Vibrator
D. Amplifier

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000-2023

82. A particle moving with a speed of an electromagnetic wave posseses K.E $4.5x10^{16}$ J. What mass can be estimated ofghe moving particle?
A. 10Kg
B. 1Kg
C. 1gm
D. 0.1Kg

83. As the particle moves in from infinity, the value of Absolutely gravitational potential energy:
A. Increases
B. Decreases
C. Remains same
D. Varies at different heights

84. If there is a vector X, then what should be added to it in order to make it its magnitude as well as its direction equivalent to null value?
A. Vector 'X'
B. Vector '–X'
C. A null vector
D. A unit vector

85. Mass of a body in an elevator which is going up with a an acceleration that is equal to the acceleration due to gravity in that place will:
A. Remain same
B. Increase
C. Decrease
D. Become zero

86. The value of linear distance covered per second of a particle moving in a circular path is:
A. rω
B. vr
C. m
D. radian

87. The force on a charge carrying conductor in the magnetic field of induction is:
A. F = I [L x B]
B. F = I x L xB
C. F = I x [L.B]
D. F = I.L.B

88. Merri bridge, wheatstone bridge, Potentiometer, P.O Box all help in the determination of:
A. Resistance
B. Potential difference
C. Voltage
D. Current

89. For forward Biasing:
A. P should be connected to the negative terminal of the battery
B. P should be connected to the negative while N to positive terminal of the battery
C. N should be connected to the negative while P to positive terminal of the battery
D. N should be connected to any high resistance

90. If the Kelvin's condition becomes un-applicale, then:
A. A refrigerator will work more efficiently
B. It will consumer less energy and do more work
C. It will rather work on Clausius condition
D. N.O.T

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000–2023

ENGLISH

91. The word closest in meaning to 'competent' is :
A. Experienced
B. Skillful
C. Knowledgeable
D. Dynamic

92. People get tensed during difficult situations, but his condition is not only with common people, but also the very much experienced psychologists get worried during the problems.
The idea that the author is producing in this passage is:
A. Everyone gets worried during their problems

B. Even psychologists get worried during their personal problems
C. Difficult situations are faced by everyone
D. Common people face alot of problems

93. The reason they gave was _____, and they explained it _____.
A. Correct, correct
B. Correct, correctly
C. Correctly, correct
D. Correctly, correctly

94. MONOTONOUS Synonym:
A. Limited
B. Conclusive
C. Extremist
D. Repeatedly

95. INTENSIVE antonym
A. Casual
B. Regressive
C. Progressive
D. Attentive

96. PRESICE antonym:
A. Consize
B. Comprehensive
C. Exaggerate
D. Explanatory

97. We heard on TV that the weather is not fine. We say that we should not go out?
What must be changed in order toakebthe sentence correct?
A. We (In first sentence)
B. We (In the second sentence)
C. That the weather
D. we should not go out

98. IMPASSIVE synonym:
A. Toneless
B. Passionate
C. Unemotionally
D. Warm

99. We have not to smoke because smoking can harm our lungs.
A. Have not
B. To smoke
C. Smoking
D. Can harm

100. Many businessesmen waste their time in checking their competitors businesses. Instead what they should do is try to improve their own style of working and bring the amendments that are required to make their business proper.
A. Businessmen need to look after their their competitors business as well
B. Many businessesmen just waste their time by poking into their competitors businesses
C. Businessmen can improve their businesses by improving their business strategies
D. Hardwork can make any business successful
