MEDICO ENGINEER

MEDICO ENGINEER

Your Free MDCAT Companion

Serving MDCAT students for 4 years — completely free of cost

Prepare smarter with trusted, high-quality MDCAT resources designed to help students practice, revise, and improve confidently.

We Provide

Free High-Quality Practice Tests

Chapter-wise and topic-wise MDCAT practice tests for strong exam preparation.

MDCAT Books

Useful books and study resources for Biology, Chemistry, Physics, English, and Logical Reasoning.

MDCAT Material

Organized MDCAT preparation material for students.

Notes & Revision Guides

Easy notes for quick revision and concept clarity.

Top Academies Material

Selected material from well-known academies to support your MDCAT preparation.

BIOLOGY

1. All of the following are correct regarding parenchyma tissue EXCEPT:

A. They are found in the epidermis, pith and cortex.

B. The whole body of Bryophytes is made up of these tissues.

C. They are loosely packed with intercellular spaces in leaves.

D. They are of two types namely fibers and sclereids.

2. The lower two pairs of ribs are:

A. True ribs

B. False ribs

C. Floating ribs

D. Articulated ribs

3. Genetically isolated unit of population is known as:

A. Deme

B. Genome

C. Biome

D. Specie

4. Micronutrient in abiotic components, is:

A. Carbon

B. Hydrogen

C. Potassium

D. Iron

e. All of above

5. Which of the following processes occurs in vascular tissue in leaves and in roots?

	In leaves	In roots
A	Sucrose enters phloem and is polymerized to starch.	Water passes from phloem to xylem by osmosis.
B	Sucrose enters phloem by active transport and the water potential becomes more negative.	Root pressure and transpiration pull are responsible for ascent of sap.
C	Water passes from phloem to xylem by osmosis making the phloem water potential less negative.	Active transport of water into xylem makes the water potential more negative.
D	Water passes out of xylem and phloem and is lost through transpiration.	Active transport of salts into the Pericycle make the water potential there high.

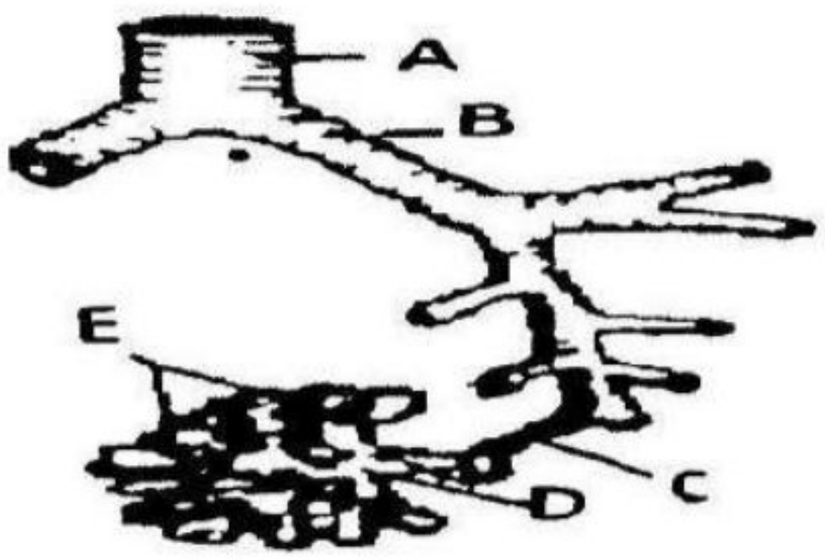

A. A

B. B

C. C

D. D

6. In the diagram showing the bronchial tree given below, parts have been indicated by alphabets. Choose the answer in which the alphabets correctly match with the parts they indicate.

A. A = trachea, B = bronchus, C= respiratory bronchiole, D = alveolar duct, E = alveoli

B. A = trachea, B = bronchus, C = alveolar duct, D = respiratory bronchiole, E = atium

C. A = bronchus, B = alveolar duct, C = respiratory bronchiole, D = trachea, E = alveoli

D. A = trachea, B = alveolar duct, C = respiratory bronchiole, D = bronchus, E = alveoli

7. Match the hormones listed under Column I with the rules given under Column II. Choose the answer which gives the correct combination of the alphabets of the two columns.

	Column I (Hormones)		Column II (Roles)
A	FSH	P	Preparation of endometrium for implantation
B	LH	Q	Female secondary sexual characters
C	Progesterone	R	Contraction of uterine muscles
D	Estrogen	S	Development of corpus luteum
E		T	Maturation of follicle

A. A=t, B=s, C=p, D=q

B. A=r, B=t, C=s, D=q

C. A=t, B=p, C=s, D=q

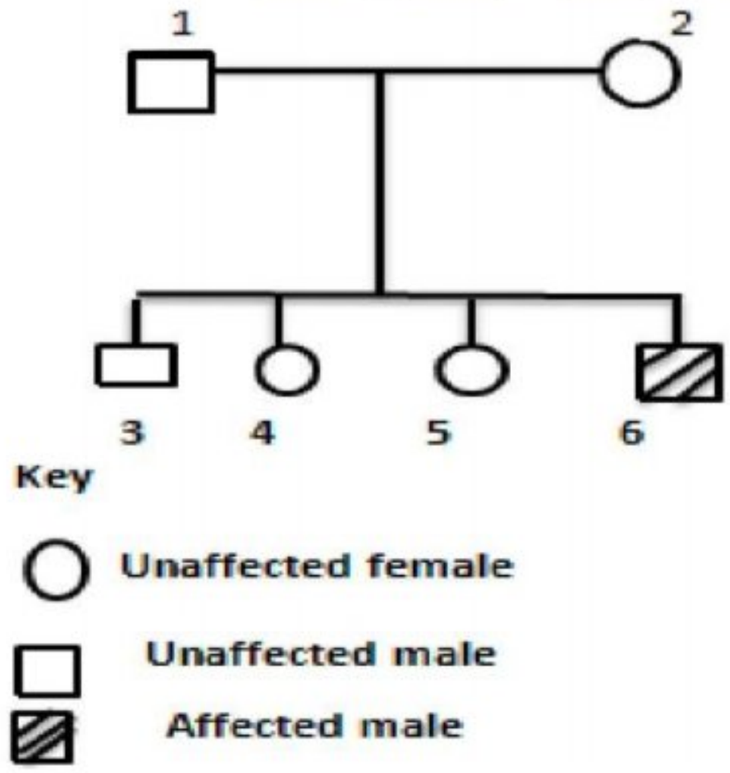

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000-2023

D. A=q, B=s, C=p, D=r

8. Sickle cell haemoglobin differs from normal haemoglobin because of a single change in an amino acid; Valine replaces glutamic acid Coding triplets in DNA for glutamic acid are CTT and CGT Coding triplets in DNA for valine are CAA and CAG. Which mRNA codon would produce sickle cell hemoglobin if substituted for the normal mRNA codon?

A. GAA
B. GTC
C. GTT
D. GUC

9. The diagram shows the inheritance of haemophilia in a family: If daughter 4 married a normal male, what is the probability that their first child would suffer from haemophilia?

A. 0
B. 0.125
C. 0.25
D. 0.5

10. The below given are the characteristics of which of the following ecosystem?
I. Includes tropical grasslands
II. Rainfall is upto 125cm per year
III. Dry season is very long
IV. Primary consumers include Zebras, giraffes and elephant etc
V. Euphorbia is an example of its plant life

A. Tropical rain forests
B. Coniferous forests
C. Savannah
D. Tundra

11. Enzyme carbonic anhydrase in RBCs help in_____transportation.

A. Oxygen
B. Iron
C. Calcium
D. Carbon dioxide

12. The tendency of a solution to take up water when separated from pure water by a selectively permeable membrane is called:

A. Osmotic pressure
B. Turgor potential
C. Diffusion pressure deficit
D. Water potential

13. Cranium (a part of the skull) forms the brain box and consist of bones:

A. 10
B. 08
C. 05
D. 03

14. Which of the followings is the fungal disease?

A. Pneumonia
B. Tinea corporis
C. Taeniasis
D. Amebiasis

15. Ribose and ribulose are the example of _____ class.

MDCAT Papers TESTING SERVICE 2022–2023

A. Triose
B. Tetrose
C. Pentose
D. Hexose

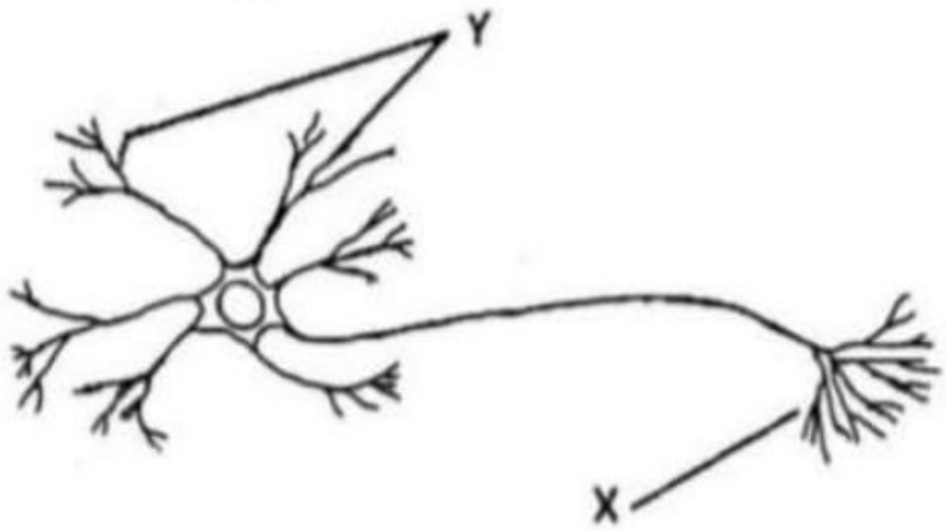

16. Which method of gaining immunity can be described as natural active immunity?

A. Feeding on colostrum
B. Inhaling the chicken pox virus
C. Injection with antibodies
D. Through the placenta

17. During ventricular systole:

A. Oxygenated blood is pumped into the aorta and deoxygenated blood is pumped into pulmonary vein.
B. Oxygenated blood is pumped into the pulmonary artery and deoxygenated blood is pumped into the aorta.
C. Oxygenated blood is pumped into the aorta and deoxygenated blood is pumped into the pulmonary artery.
D. Oxygenated blood is pumped into the pulmonary artery and deoxygenated blood is pumped into the pulmonary vein.

18. The diagram shows a neuron:

Which of the given structures could be found at X and Y?

	X	Y
A	brain	intestine
B	brain	leg
C	eye	hand
D	skin	spinal cord

A. A
B. B
C. C
D. D

19. Which of the following contains enzymes for the detoxification of alcohol?

A. Ribosomes
B. Peroxisome
C. Glyoxysomes
D. Lysosomes

20. An Inter-breeding population of finches became separated geographically,
forming two isolated groups. Each group became subject to different selective pressures, on group was introduced into the habitat of the other. Which one of the following would determine whether they now formed two distinct species?

A. They had been separated for more than three million years.
B. They failed to produce fertile F1 hybrids
C. They showed marked differences in the shape of their beaks.
D. Their plumage had become markedly different.
E. Several genes now possessed different base sequences.

21. Four tubes were set up under certain conditions as a shown in the

MDCAT Past Papers BY PRESTIGIOUS TESTING SERVICE 2020

table. After Incubation, each sample was analysed to determine the presence ofcarbon dioxide and lactate. In which tubes is lactate most likely to be present?

TUBES	CONDITIONS	CONTENTS
1	Oxygen deficient	Pyruvate + yeast
2	Oxygen rich	Glucose + facultative aerobes
3	Oxygen rich	Glucose + an animal cell containing mitochondria
4	Oxygen deficient	Pyruvate + obligate aerobes

A. 1 & 2 only
B. 2 , 3 & 4 only
C. 1 & 4 only
D. 1 , 2 & 3 only

22. Which of the following statements describe sliding joints?
I. These joints allow bone to slide over another bone to make movement in many directions.
II. Vertebrae are linked by sliding joints.
III. These joints don't allow the joining bones to move.
IV. Bones of ankle or wrist are connected by sliding joints.
A. I only
B. I & II only
C. I & III only
D. I & IV only
E. I , II , III & IV

23. The components of feedback mechanism are:
A. Receptors, Insulators, Effectors
B. Receptors, Suppressors, Effectors
C. Receptors, Control centre, Effectors
D. Receptors, Depressors, Effectors

24. Which of the following processes occur by mitosis?
I. Cloning of plasma cells
II. Gamete production
III. Replacing damaged cells
A. II only
B. III only
C. I & III only
D. I, II & III

25. Plasmodium belongs to class _____.
A. Flagellate
B. Sarcodina
C. Sporozoa
D. Ciliate

26. Pistal is the part of:
A. Sepal
B. Petal
C. Stamen
D. Carpel

2. Group Deuterostomata includes phylum:
A. Chordata
B. Annelida
C. Arthropoda
D. Echinodermata
E. Both A & D

28. Which of the following options give the correct sequence (steps) in recombinant DNA technology?
I. Selection of bacteria with desired gene.
II. Insertion of rDNA into host cell,
III. Preparation of recombinant DNA molecules.
IV. Multiplication and production of numerous copies of host with rDNA in it.
A. I → II→ III → IV
B. I → III→IV→II
C. III→ II→ IV→ I
D. III→ IV→ II→ I

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000–2023
Medicoengineer.com

E. IV→III →I→II

29. The continuous decrease in water table and favourable changes in substratum makes the pond suitable for plants, they have much branched rhizome system. The dense growth of plants increases the rate of transpiration, which ultimately exposes the marshy soil. The nutrients present in pond due to action of oxygen of air are now oxidized to nitrates and sulphates. The representative plant species of this stage are Cyperus and Carex. The animals of this stage are snails like Anodonta and Psidium. The above given lines tell about which of the following stage of hydrosera in a pond?

A. Climax stage
B. Wood land stage,
C. Sedge meadow stage
D. Reed swamp stage
E. Submerged stage

30. Nostoc filaments are intermixed in gelatinous mass that form ball like structure called:

A. Chromoplasm
B. Sarcina
C. Kokkos
D. Coenobium

CHEMISTRY

31. 1 dm3 of methyl alcohol is heated over Cu at 300°C; we get:
$CH_3OH \rightarrow HCHO + H_2$
The volume in dm^3 of hydrogen gas obtained is:

A. 0.5 dm^3
B. 1 dm^3
C. 1.5 dm^3
D. 2 dm^3
E. 2.5 dm^3

32. Cathode rays:

A. are heavy in the case of bigger atoms
B. are light in the case of smaller atoms
C. are more intense in the case of radioactive atoms
D. depend on the nature of the gas
E. are independent of the nature of the gas

33. Pauli Exclusion Principle states that no two electrons can have the entire four quantum numbers same. According to this principle which of the following pairs of atoms shows difference in their Principle Quantum Number?

A. H & He
B. Li & Be
C. Na & K
D. Na & Mg
E. K & Ca

34. C2H5---OH boils at a higher temperature than CH3---O---CH3 though both have the same molecular formula C2H6O. The reason is the alcohol has:

A. Ionic bonding
B. Covalent bonding
C. Electrovalent bonding
D. Polar bonding
E. H-bonding

35. For a 51% lonic molecule, the difference in EN is:

A. 1.5
B. 1.7
C. 1.9
D. 2
E. 2.1

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000-2023
Medicoengineer.com

36. At 100°C, 0.1 mole of N2O4, is heated in a one dm³ flask. At equilibrium concentration of NO2 was found to be 0.12 moles. Calculate Kc for the reaction.

A. 0.12
B. 0.36
C. 0.21
D. 0.012
E. 0.02

37. In the commercial electrochemical process for aluminums extraction the electrolyte used is:

A. Al(OH)3 in NaOH solution
B. an aqueous solution of $Al_2(SO4)3$
C. a molten mixture of Al2O3 and Na3AIF6
D. a molten mixture of AIO(OH) and Al(OH)3

38. Balmer series is important as:

A. it is the first series
B. it gives sharp lines
C. it lies in visible region
D. it was first discovered
E. it has minimum energy

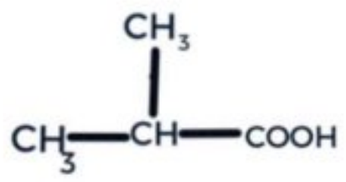

39. Which of the following compounds is expected to be coloured?

A. Ag2SO4
B. CuCl
C. MgF2
D. CuF2

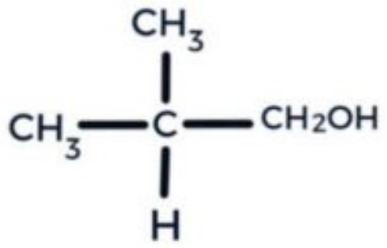

40.

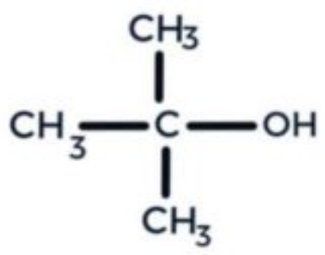

A.

B.

C.

D.

CH_3COCH_3

41. Mark the correct statement about hydrides of group V-A:

A. The hydrides of Group V-A are covalent.
B. The hydrides of Group V-A are lonic.
C. Salt of the hydrides of Group V-A are covalent half are lonic.
D. None of the hydride of V-A are covalent.

42. Nylon 6, 6 is prepared by the condensation of:

A. Adipic acid and hexamethylene diamine
B. Adipic acid and tetramethylene diamine
C. Phenol and formaldehyde
D. Diol and dichrboxylic acid

43. α-amino acids are compounds having carboxylic acid as well as amino functional groups attached to:

A. Any C-atom in the molecule
B. Alternate carbon atoms
C. Neighboring carbon atoms
D. Same carbon atom

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000-2023

44. An Alkyl halide reacts with ammonia to yield:

A. Amide

B. Cyanide

C. Amine

D. Imine

45. SN2 reaction can be best carried out with:

A. Primary alkyl halide

B. Sec-alkyl halide

C. Tert-alkyl halide

D. All react with similar mechanism

46. The arrangement of element in the ascending order of atomic weight is made by:

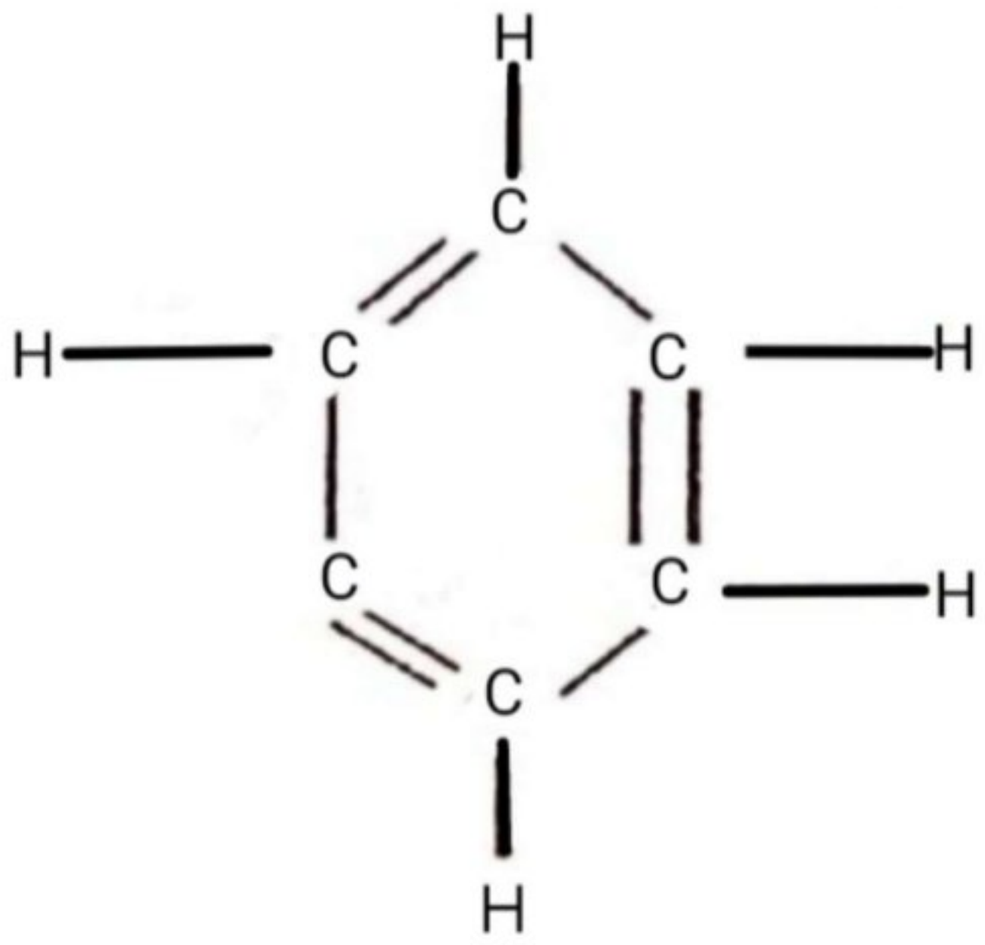

A. Ingold

B. Hughies

C. Newland

D. J.W Dobereiner

47. Which of the following element is needed to add in the given diagram to make it aromatic phenol?

A. ---H

B. ---OH

C. ---CH

D. ---H2

48. Four words are shown below: similar polar solvents, electrostatic, solvation, lattice energy

Ionic compounds are soluble in water and ___P___ because of the strong __Q__attractions between the ions and polar molecules of solvent. The surrounding of the ions by the solvent molecules ___R___ releases the energy which is known as the energy of solvation. This energy usually overcomes the high ___S___of the ionic compound.

	Lattice energy	Similar polar solvents	Electrostatic	Solvation
A.	S	Q	R	P
B.	P	Q	S	R
C.	S	P	Q	R
D.	R	S	P	Q
E.	P	Q	R	S

A. A

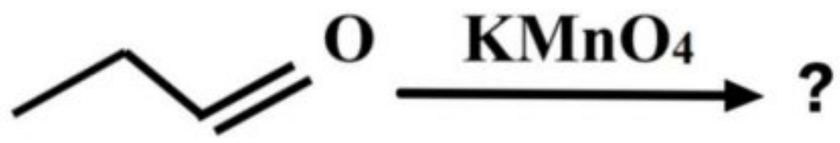

B. B

C. C

D. D

E. E

49. What is the product of the below reaction?

A. C3H7OH

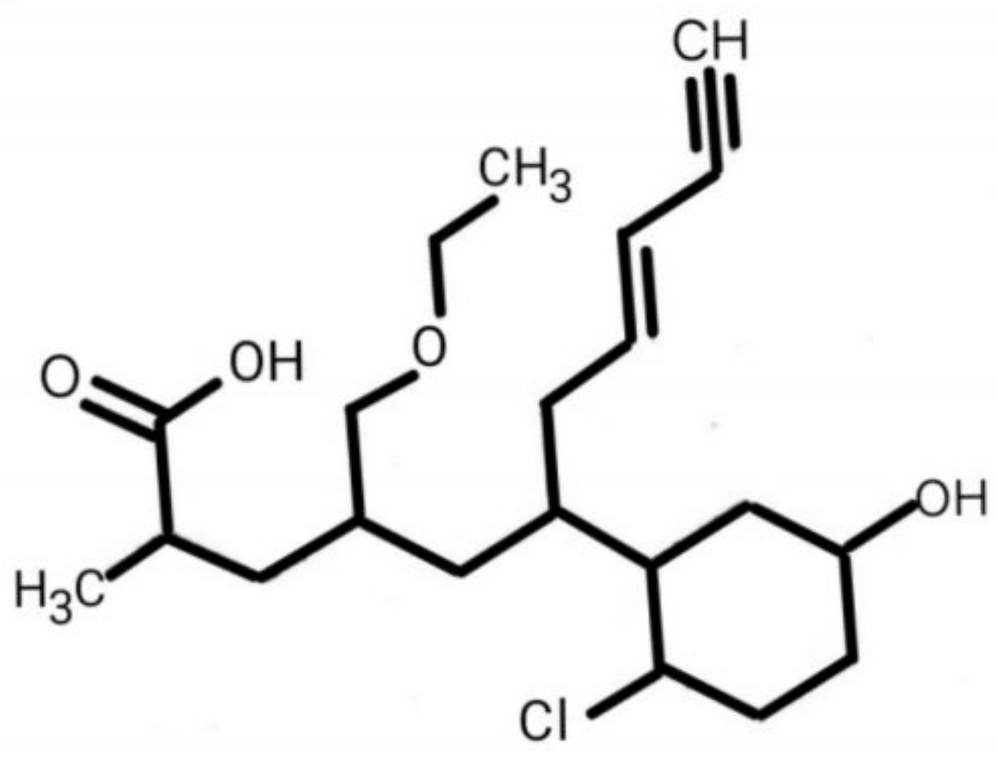

B. C2H5COOH

C. C3H7CHO

D. CH3COOH

50. The IUPAC name for the structure below ends with what suffix?

MDCAT Past Papers TESTING SERVICE 2019-2024

A.-ol
B. -ide
C. -oic acid
D. -yne

51. The term +dx/dt in the rate expression refers to the:
A. Decrease in concentration of the reactant x
B. Instantaneous rate of the reaction
C. Increase in concentration of the reactant x
D. Increase in solubility of the reactants

52. In which of the following reactions Kp > Kc?
A. $2SO_2 + O_2 \rightarrow 2SO_3$
B. $N_2 + 3H_2 \rightarrow 2NH_3$
C. $PCl_5 \rightarrow PCl_3 + Cl_2$
D. $N_2 + O_2 \rightarrow 2NO$
E. Both C and D

53. Meta directing group is:
A. ----OH
B. ----OR
C. ----COR
D. ----NHR

54. A sample of ideal gas has a volume of 128 ml at -27 °C to what temperature must the gas be heated at constant pressure if final volume is to be 214 ml?
A. 120°C
B. 130°C
C. 138°C
D. 140°C
E. 150°C

55. 6,7-dimethyl-9-D-Pribitylosoalloxazine is the IUPAC name of:
A. Nicotinic acid
B. Riboflavin
C. Thiamine
D. Antirachitic
E. Tocopherol

56. Fuming sulphuric acid contains:
A. SO4
B. SO3
C. S3O3
D. S2O3
E. SO2

57. The principle quantum number is related to the:
A. Orbital angular momentum
B. Size of the orbital
C. Orientation of the orbital
D. Spin of orbital

58. Geometrical isomerism in alkenes is due to:
A. Restricted rotation about C = C bond
B. Free rotation about C = C bond
C. Optical rotation about C = C bond
D. Oscillation of H-atom between two polyvalent atoms

59. Trend of ionization energy in a group from top to bottom is:

MDCAT Past Papers BY PRESTIGIOUS TESTING SERVICE 2000-2023

A. Increases
B. Decreases
C. Remains same
D. Increases then decreases
E. Constant

60. The catalyst used in Friedel Craft reaction is:
A. FeCl3
B. PVC
C. Pt/Pd/Ni
D. AlCl3

PHYSICS

61. If vector A is perpendicular to vector B i.e. θ = 90° ,or one of the two vector is
null vector then A.B =?
A. 0
B. 30
C. 45
D. 90
E. 180

62. An orange is dropped from the top of a tower. If it takes 10 seconds to hit the ground, find the height of the tower? (g=9.8 m/s²)
A. 280 meters
B. 310 meters
C. 390 meters
D. 490 meters
E. 510 meters

63. A vehicle travelling at a constant speed of 60 km/h rounds a curve of radius 100m. Find it's acceleration?
A. 1.777 m/s²
B. 2.777 m/s²
C. 3.777 m/s²
D. 4.777 m/s²
E. 5.777 m/s²

64. An 80 kg man runs up a hill through a height of 4 m in 3 seconds. How much work does he do against gravitational forces? (g=9.8m/s²).
A. 2136 J
B. 3136 J
C. 4136 J
D. 5136 J
E. 6136 J

65. A body with a mass of 0.2 kg is attached to a spring and placed on a horizontal frictionless table. The string is stretched 30 cm, when a force of 6 N is applied. What is its spring constant?
A. 5 N/m
B. 10 N/m
C. 15 N/m
D. 20 N/m
E. 25 N/m

66. Identify the technical and scientific application/s of polarization of light in our daily life:
I. The determination of the concentration of optically active substance such a sugar..
II. In photography, to enhance the effect of sky and clouds
III. It is used in photography under water.
A. I only
B. II only
C. III only
D. I and II
E. I , II and III

67. What will be the magnification of the lens, when an object is placed at a

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000-2023

distance of 60 cm from a concave lens of focal length 30 cm?

A. 1/3
B. 1/5
C. 1/7
D. 1/9
E. 1/11

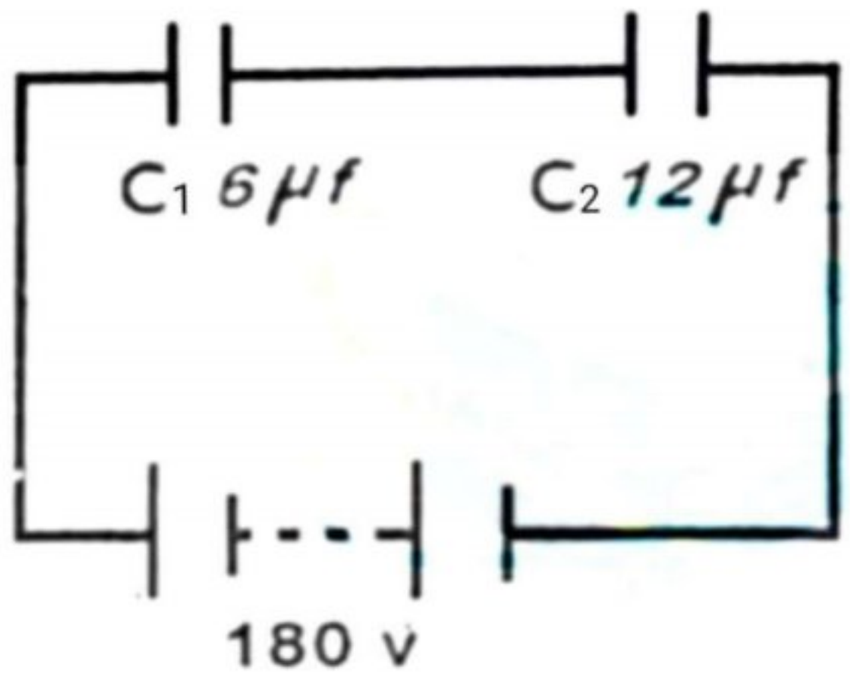

68. What is the volume occupied by a gram-mole of a gas at 0°C pressure of one atmosphere? (R=8.314 J/mole.K)

A. 12.4 liters/mole
B. 14.4 liters/mole
C. 16.4 liters/mole
D. 18.4 liters mole
E. 22.4 liters/mole

69. An object is lifted 5 m above leveled ground, mass of object is 20 kg and acceleration due to gravity is 10 N kg, potential energy of the object is:

A. 400 J
B. 1000 J
C. 2.5 J
D. 0.4 J

70. Two capacitors C_1 (6μf) and C_2 (12μF) are in series connected across a 180 volts d.C. supply. Calculate the charges on C1 and C2 respectively.

A. 120 x 10-⁶ C , 420 x 10-⁶ C
B. 320 x 10-⁶ C , 420 x 10-⁶ C
C. 420 x 10-⁶ C , 320 x 10⁶ C
D. 720 x 10-⁶ C , 720 x 10⁶ C
E. 820 x 10-⁶ C , 420 x 10⁶ C

71. The units of length, time and mass in SI units are the same as the units of these quantities in _____.

A. MKS system
B. CGS system
C. ft-lb system
D. Both B & C

72. Three words are shown below: non-zero , Isobaric , Isobarically These words can be used in the spaces P, Q and R to complete the sentences below. ____P____ Process is that process which takes place at constant pressure. In such a process the heat transferred and the work are both _____ Q_____When water enters the boiler of a steam engine and is heated to its boiling point, vaporized and then the steam is superheatad, all these processes take place ____ R ____. Such processes play an important role in Q mechanical engineering.

	Isobaric	Non-zero	Isobarically
A	R	Q	P
B	R	P	Q
C	P	Q	R
D	Q	R	P

A. A
B. B
C. C
D. D

73. Resistance of a wire is R. If you increase the length of wire such that its length doubles. The stretched wire will have resistivity:

A. R/2

MDCAT Past Papers BY PRESTIGIOUS TE... 2000–20...

B. R
C. 2R
D. 4R

74. If modulated signal frequency is represented by fm carrier frequency by fc .fmin and fmax represent minimum and maximum values respectively than upper sideband refers to the range:
A. fc- fmax to fc- fmin
B. fc + fmin to fc + fmax
C. fc - fm
D. fm – fc

75. In SI system of Units, the unit of power is:
A. Joules
B. Ergs
C. Watts
D. Watt-hours

76. If 'T' Is the tension and 'μ' the mass per unit length of the stretched wire in a sonometer, the velocity of wave produced on bringing a tuning fork near it is:
A. $v = \mu T$
B. $v = (\mu/T)^{1/2}$
C. $v = T/\mu$
D. $v = (T/\mu)^{1/2}$

77. An astronomical telescope is constructed using _____ objective lens and _____ eyepiece.
A. Convex .... Concave
B. Convex .... Convex
C. Concave .... Concave
D. Concave .... Convex

78. The relationship for X-ray diffraction in atomic layers of crystals with spacing 'd' amongst the crystal planes, is:
A. $m\lambda = d \sin\theta$
B. $2m\lambda = d \sin\theta$
C. $m\lambda = 2d \sin\theta$
D. $(2m + 1)\lambda = 2d \sin\theta$

79. When interference between thin films occurs, the path difference between two interfering rays is 2t.If 'η' is the refractive index of the medium, the bright circles are obtained when _____ with m= 0, 1, 2, 3, ...
A. $2m = \eta t$
B. $m\lambda = 2\eta t$
C. $(2m + 1)\lambda = 2\eta t$
D. $(2m + 1)\lambda = 4\eta t$

80. The ground level of Hydrogen atom has energy value in eV:
A. 13.6
B. 1.36
C. -1.36
D. -13.6

81. If T_1 is the temperature of the hot body and T2 is the temperature of the cold body, the efficiency of a Carnot engine is given by:
A. 1-(T1 / T2)
B. 1- (T2 / T1)
C. (T1 / T2) -1
D. (T2 / T1) -1

82. On Fahrenheit scale lower point is marked 32 and upper point 212. Interval between them is equally divided _____ into equal parts.
A. 190
B. 180
C. 100
D. 200

MDCAT Past Papers BY PRESTIGIOUS TESTING SERVICE 2000–2023

83. Radioactivity results in ionization 'in' materials. The ionizing power of _____ is highest.

A. X rays

B. α rays

C. β rays

D. γ rays

84. During the process of nuclear disintegration, when beta particle emission occurs, atomic no of the atom changes by _____ and it's mass number changes by _____.

A. One unit ... One unit

B. One unit ... No units

C. No units ... One unit

D. No units ... No units

85. The radio isotopes radiating Gamma rays, advisable for treatment of patients need to have _____ half-life.

A. Long

B. Short

C. Intermediate

D. Any arbitrary

86. 4 resistors of 10 Ohm each are connected in an electric circuit In series. Their combined effect is equivalent (In Ohm) to:

A. 10

B. 20

C. 30

D. 40

E. 50

87. A steady current of 5 A is drawn from an electric source working at a voltage of 100 v. The power consumed (In Watts) is _____.

A. 0.05

B. 5

C. 500

D. 50000

88. The magnetic field of induction B is measured in the units which are equivalent to:

A. Newton/Coul × meter/sec

B. Newton/Ampere x meter square

C. Newton/Ampere x meter

D. Both A and C

89. Which of the following waves are electromagnetic waves?

A. X rays

B. Beta rays

C. Alpha rays

D. Proton rays

90. The spectral series of Hydrogen spectra that lies in ultraviolet region is:

A. Balmer series

B. Bracket series

C. Lyman series

D. Paschen series

ENGLISH

91. Question 91-92:
Complete the sentences by choosing the most appropriate option from the given lettered choices (A to D/E) below each.
The examination will_____ in ten minutes time.

A. Finish

B. Finished

C. Shall finish

D. Had finish

92. I forgot_____ take down his telephone number.

A. Too

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000-2023

B. To
C. On
D. Of
E. In

93. Question 93-94:
Identify the word or phrase that needs to be changed for the sentence to be correct:
The last bus leave in five minutes, and the trams stop running too.
A. The
B. Leave
C. Minutes
D. Stop
E. No error

94. Some people have successfully taken up painting quite late in life.
A. Some
B. Successfully
C. Painting
D. Late
E. No error

95. Question 95-96:
Choose the word most similar in meaning to the capitalized one.
WORTH:
A. Value
B. Dearth
C. Weakness
D. Burden

96. ANCIENT:
A. Modern
B. Old
C. Current
D. Vacant

97. Question 97-98:
Choose the lettered word or phrase that is most nearly opposite in meaning to the word in capital letters.
FORTUNE:
A. Luck
B. Capital
C. Bad luck
D. Wealth

98. INITIATE:
A. Start
B. Finish
C. Originate
D. Collapse

99. Question 99-100:
Read the passage to answer.
If a writer has a point of view on some such subject as religion, politics or history, and wishes to persuade readers to accept his point of view, he is not likely to state his point of view tersely and leave it at that. He will bring forward the evidence that supports his point of view. He will argue from that evidence to his conclusions. Like a lawyer he may call evidence from different sources, all. in support of his main case. Some parts of his evidence and argument may be less important than others and may be discarded altogether in a summary or presented in less detail. A writer whose aim is to persuade is likely to repeat some of the assertions of key importance to his argument so that the reader may not forget them, but in a summary once a thing is said It need not be said again. The writer of a summary must first of all be absolutely certain what case the writer of the original passage is making what set of facts or opinions he is trying to

establish and the summary must convey the real message of the passage fully and clearly. Important statements essential to the writer's argument must be preserved. "If someone wants to persuade his readers to his point of view on subjects like religion, politics or history then he has to:"

A. Simply state his point of view tersely

B. Provide evidences for his conclusions

C. He has to forcefully implement his beliefs

D. He has to provide only the summary

100. A summary writer:

A. needs to explain things again and again

B. must write every important or less important information equally

C. must convey the real message of the passage fully and clearly

D. needs to give his own arguments & views in summary
