MEDICO ENGINEER

MEDICO ENGINEER

Your Free MDCAT Companion

Serving MDCAT students for 4 years — completely free of cost

Prepare smarter with trusted, high-quality MDCAT resources designed to help students practice, revise, and improve confidently.

We Provide

Free High-Quality Practice Tests

Chapter-wise and topic-wise MDCAT practice tests for strong exam preparation.

MDCAT Books

Useful books and study resources for Biology, Chemistry, Physics, English, and Logical Reasoning.

MDCAT Material

Organized MDCAT preparation material for students.

Notes & Revision Guides

Easy notes for quick revision and concept clarity.

Top Academies Material

Selected material from well-known academies to support your MDCAT preparation.

BIOLOGY

SINDH MDCAT 2017 PAST PAPER

1. The following sequence of events occurs at the neuromuscular junction.
Nerve impulse → release of V →end plate potential → W produced in muscle fibre →X released from sarcoplasmic reticulum → formation of Y → muscle contraction
Which one of the following shows the correct sequence from V - Y ?

	V	W	X	Y
A	acetylcholine	action potential	calcium ions	actomyosin
B	acetylcholine	action potential	actomyosin	calcium ions
C	actomyosin	acetylcholine	calcium ions	action potential
D	calcium ions	action potential	acetylcholine	actomyosin
E	calcium ions	actomyosin	acetylcholine	action potential

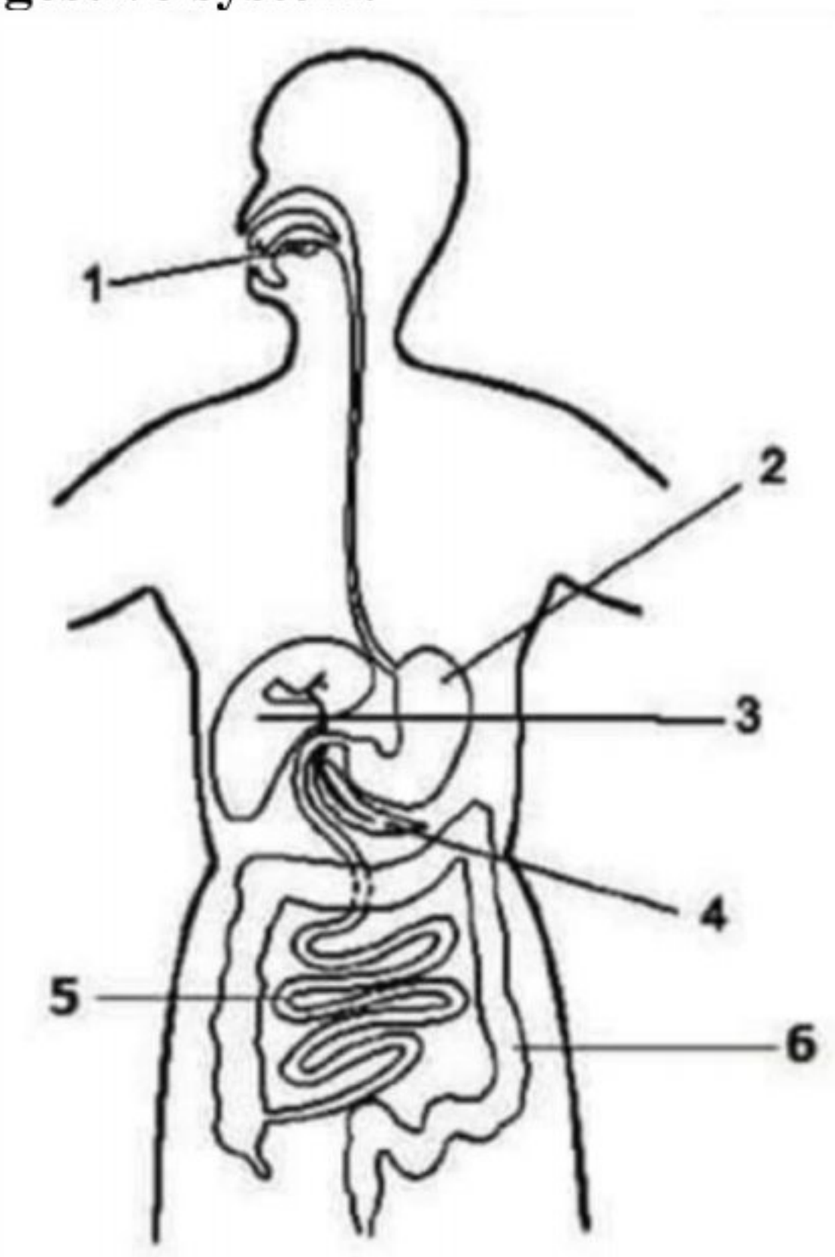

2. Which group of organisms has the following features?
I. three pairs of jointed legs
II. three-part segmented body
III. one pair of antennae
A. Arachnids
B. Crustaceans
C. Insects
D. Myriapods

3. The table shows some characteristics of four different vertebrates. Which vertebrate is a reptile?
key:

	fins	legs	scales	hair
A	✓	x	✓	x
B	x	✓	✓	x
C	x	✓	x	x
D	x	✓	x	✓

✓ = feature present
X = feature absent
A. A
B. B
C. C
D. D

4. The diagram shows some organs of the digestive system.

Where is amylase present?
A. 1 , 4 and 5
B. 1, 2 and 3
C. 2 , 6 and 4
D. 3 , 5 and 4

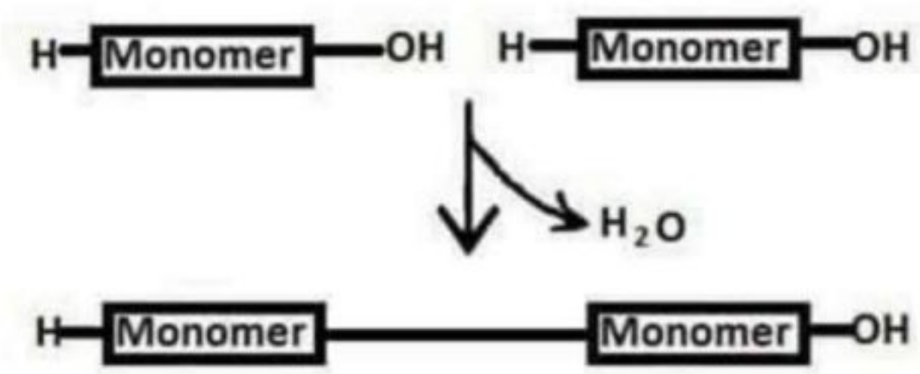

5. Which bones meet at the elbow joint and what kind of movement do they allow?

	BONES	MOVEMENT
A.	Humerus and scapula	sliding
B.	Humerus and scapula	back and forth
C.	Ulna and humerus	sliding
D.	Ulna and humerus	back and forth

A. A
B. B
C. C
D. D

6.The above diagram represents the process of:

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000-2023
Medicoengineer.com

A. Hydrolysis
B. Condensation
C. Neutralization
D. Metabolism

7. Which of the following is correctly matched?

A	Ribosomes	f	Detoxification of alcohol
B	Lysosomes	g	Formation of astral ray
C	Centriole	h	Protein synthesis
D	Peroxisomes	i	Destroyers of foreign particles
E	Smooth ER	j	Converts cholesterol into vitamin D in skin

A. Af, Bg, Cj, Di, Eh
B. Ah, Bi, Df, Cg, Ej
C. Aj, Bi, Ch, Dg, Ef
D. Ah, Bf, Dg, Ci, Ej

8. Pyruvic acid is the end product of:
A. Glycolysis
B. Krebs cycle
C. Oxidation
D. Electron transport system

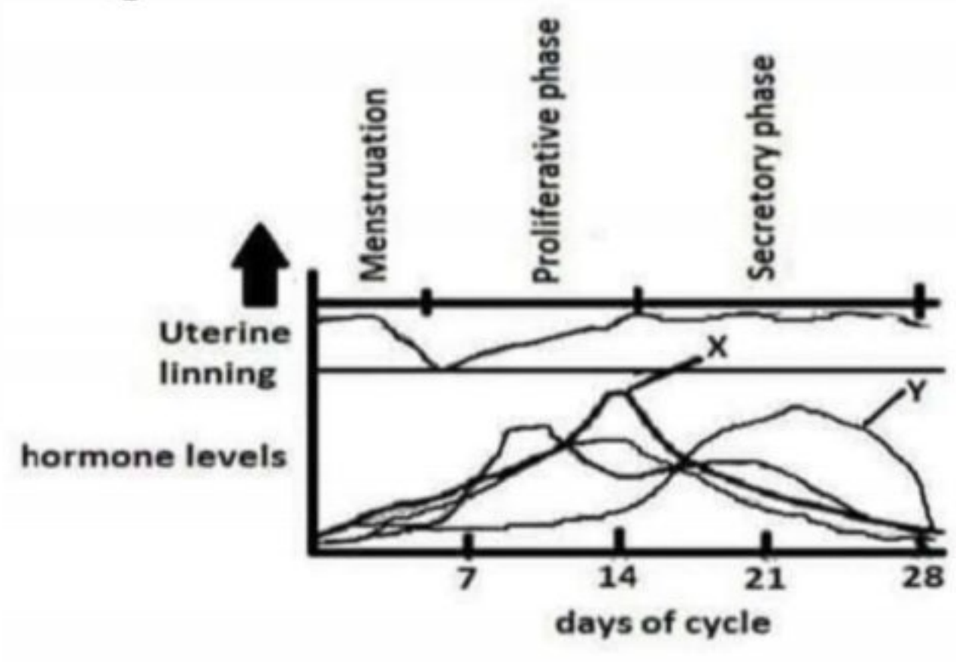

9. Humoral immunity is carried by a special group of cells called:
A. B-cells
B. Killer cell
C. Helper cell
D. Null cell

10. Identify the correctly matched pair relating to a term and its meaning/function/example:
A. Nitrogen cycle... Rhizopus
B. Denitrifying bacteria... change protein to ammonia
C. Biosphere... where life exists
D. Lithosphere... water, air and soil on the surface of earth

11. Which of the following RNA sequences would be transcribed from the DNA sequence ATGCCTAGGAC?
A. TACGGATCCTG
B. UAGCGAUCCUG
C. AUGCCUAGGAC
D. UACGGAUCCUG
E. GCAUUCGAAGU

12. Human cells maintain concentration gradients across their plasma membranes, such that there is a high sodium concentration outside the cell and a high potassium concentration inside the cell. Suppose that within the cell membrane are sodium "leak" channels. These channels would allow sodium to:
A. move out of the cell by simple diffusion
B. move into the cell by simple diffusion
C. move out of the cell by facilitated diffusion
D. move into the cell by facilitated diffusion
E. move into the cell by active transport

13. Question 13 - 15:

The hormone labeled X in the diagram is often used in over-the- counter diagnostic tests to determine when

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000–2020

ovulation has occurred. This hormone is:

A. Estrogen

B. Progesterone

C. FSH

D. LH

E. Testosterone

14. Based on the peak levels of hormone X, on what day of the cycle is ovulation most likely to occur?

A. Day 21

B. Day 14

C. Day 12

D. Day 25

E. Day 25

15. The hormone labeled Y in the diagram is:

A. progesterone, secreted by the corpus luteum after ovulation has occurred

B. progesterone, secreted by the ovary after ovulation has occurred

C. estrogen, secreted by the corpus luteum after ovulation has occurred

D. estrogen, secreted by the ovary after ovulation has occurred

E. estrogen, secreted by the follicle before ovulation occurs

16. Which of the following statement(s) is/are correct regarding a nucleus?

I. Stores wastes and other Substances

II. Contains genetic material

III. Helps in cellular transport system

IV. Control centre of the cell

A. I only

B. I & II

C. II & III

D. II & IV

E. III & IV

17. When the tuft of flagella are present at both the ends in the structure of bacterial cell, then the condition is known as:

A. Atrichous

B. Lophotrichous

C. Peritrichous

D. Amphitrichous

E. Bitrichous

18. Cystic fibrosis patients lack a gene that codes for a transmembrane carrier of:

A. Na+ ions

B. K+ ions

C. CI- ions

D. Ca2+ ions

E. Mg2+ ions

19. Which features do animal cells share with plant cells?

	Chloroplast	Cytoplasm	Nucleus	mitochondria
A	✓	✓	✓	✓
B	✓	✗	✓	✗
C	✗	✓	✓	✓
D	✗	✗	✗	✓

A. A

B. B

C. C

D. D

20. Platyhelminthes means:

A. Flat worms

B. Round worms

C. Segmented worms

D. None of the above

21. All of the following are mammals EXCEPT the:

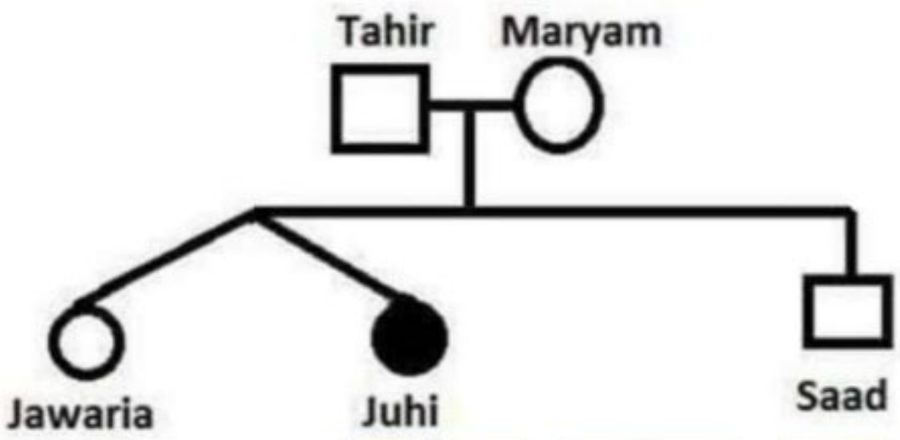

A. Propoise

B. Shark

MDCAT Past Papers BY PRESTIGIOUS TESTING SERVICE 2000-2023

C. Whale
D. Walrus
E. Seal

22.In the pedigree of a family shown above, brown eyes are indicated as 'white circle' and blue eyes indicated as 'black circle'. Jawaria and Juhi are twins. From this chart, it can be determined that:

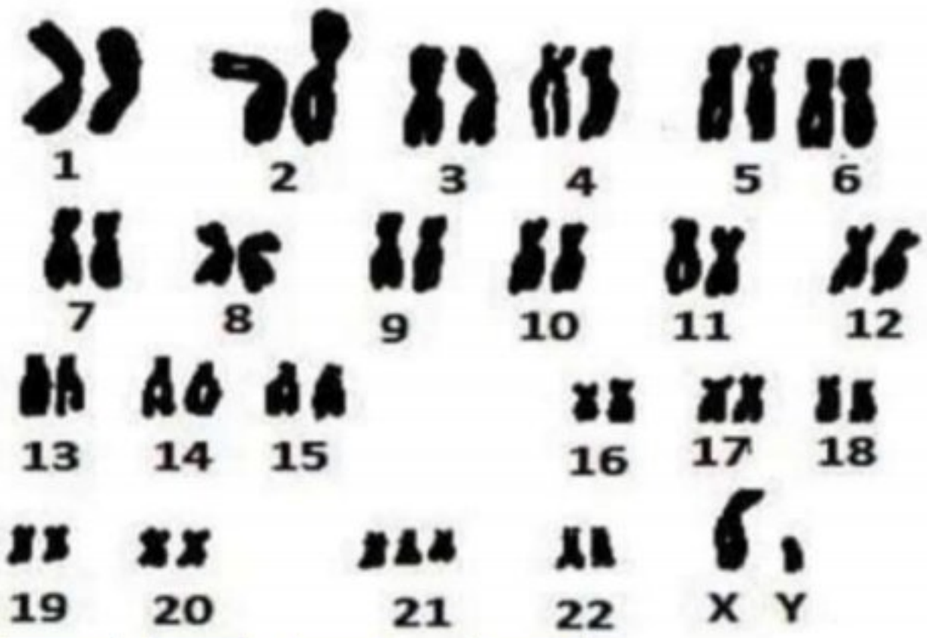

A. Tahir and Mary are homozygous for brown eyes
B. Jawaria and Juhi are identical twins
C. Juhi is heterozygous for blue eyes
D. Juhi is homozygous for blue eyes
E. Jawaria and Saad are homozygous for brown eyes

23. Viruses resemble living things because they:
A. Circulate
B. Move
C. Reproduce
D. Are crystalline
E. Are able to respond to stimuli in the environment

24. A part of the digestive system that is not in contact with food is the:
A. Small intestine
B. Stomach
C. Liver
D. Large Intestine
E. Trachea

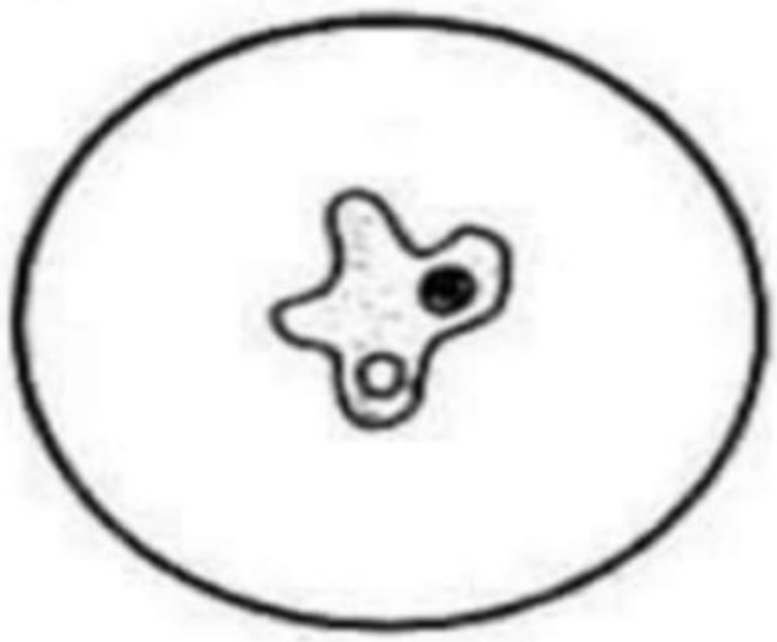

25. All of the following protect the body against the entrance of germs except:
A. Tears
B. Mucous membranes
C. Ciliated cells
D. White blood cells
E. Red blood cells

26.The above diagram illustrates:

A. Hemophilia
B. Phenylketonuria
C. Sickle cell anemia
D. Down's Syndrome

27. Question 27-28:

A student studied a drop of pond water with the low power of compound microscope and made the following exact drawing of an organism she observed:
In which kingdom is the organism classified:

MDCAT Past Papers
BY PRESTIGIOUS TE
2000-20

A. Protista
B. Monera
C. Metazoa
D. Animal
E. Bryophyta

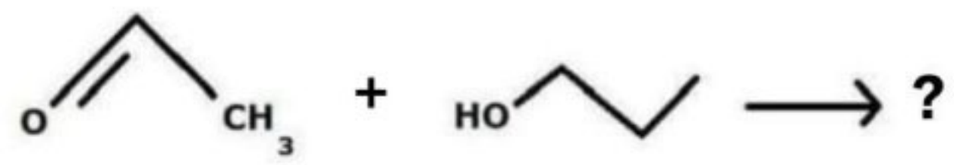

28. The organism moves by means of:
A. Peristalsis
B. Pinocytosis
C. Porifera
D. Protozoa
D. Pseudopodia

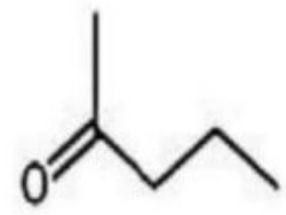

29. In a pyramid of energy, which level represents the greatest amount of energy?
A. Producers
B. First-order consumers.
C. Second-order consumers
D. Third-order consumers
E. Decomposers

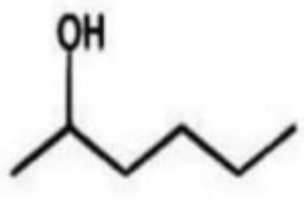

30. The phenomenon known as crossing-over occurs during:
A. Mitosis
B. Meiosis
C. Geographic distribution
D. Active transport

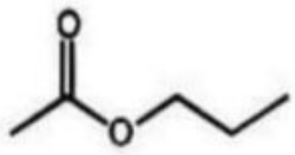

CHEMISTRY

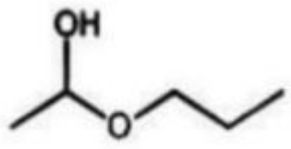

31. What is the product of the below reaction?

A.

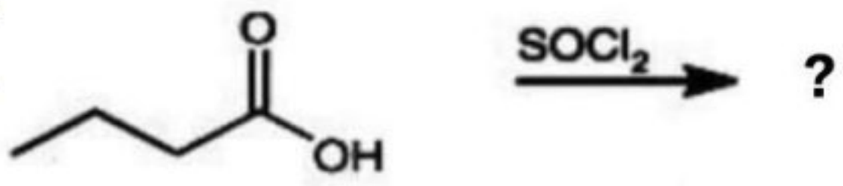

B.

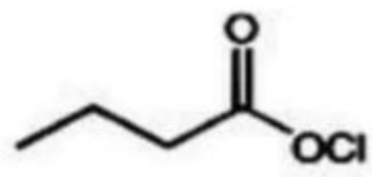

C.

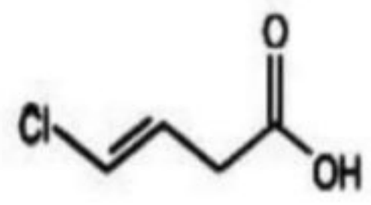

D.

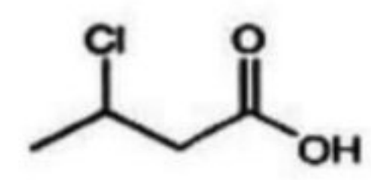

A. A.
B. B.
C. C.
D. D.

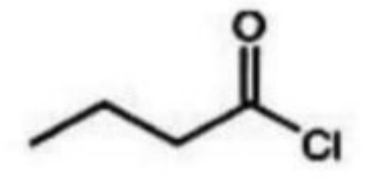

32. What would be the product of the below reaction?

A.

B.

C.

D.

MDCAT Past Papers BY PRESTIGIOUS TEST 2000-2020

33. Which of the following values of heat of formation indicates that the product is least stable?

A. -94 k cal

B. -231 k cal

C. +21.4 k cal

D. +64.8 k cal

34. The enthalpy of certain reaction at 273 K is -20.75 kJ. The enthalpy of same reaction at 373 K (if heat capacities of reactants and products is same) will be:

A. -20.75 kJ

B. -2075 kJ

C. Zero

D. -20.75 x 373/273 kJ

35. Most abundant salt of sodium in nature is:

A. NaNO3

B. Na2SO4

C. NaOH

D. NaCl

36. A gas that reacts with CaO and not with NaHCO3 is:

A. CO2

B. Cl2

C. O2

D. N2

37. Which of the following statements is correct?

A. H3PO3 is dibasic and reducing

B. H3PO3 is tribasic and reducing

C. H3PO3 is tribasic and non-reducing

D. H_3PO3 is dibasic and non-reducing

38. Which of the following statement about H_2S is false?

A. It is a covalent compound

B. It is a gas with bad smell

C. It is a stronger reducing agent than H_2O

D. It is a weak base in water

39. What is the volume in cm^3 of 3.01 x 10^{23} molecules of O_2 gas at S.T.P?

A. 1000 cm^3

B. 11000 cm^3

C. 1120 cm^3

D. 11200 cm^3

40. The amount of solute present in the given amount of solvent is called:

A. Molarity

B. Molality

C. Concentration

D. Solubility

41. In the reaction $2Fe + Cl_2 \leftrightarrow 2FeCl3$

A. Fe is reduced

B. Fe is oxidized

C. Cl_2 is oxidized

D. None of the above

42. The process in which electric current is used to carry out a nonspontaneous redox reaction is called:

A. Electrolyte

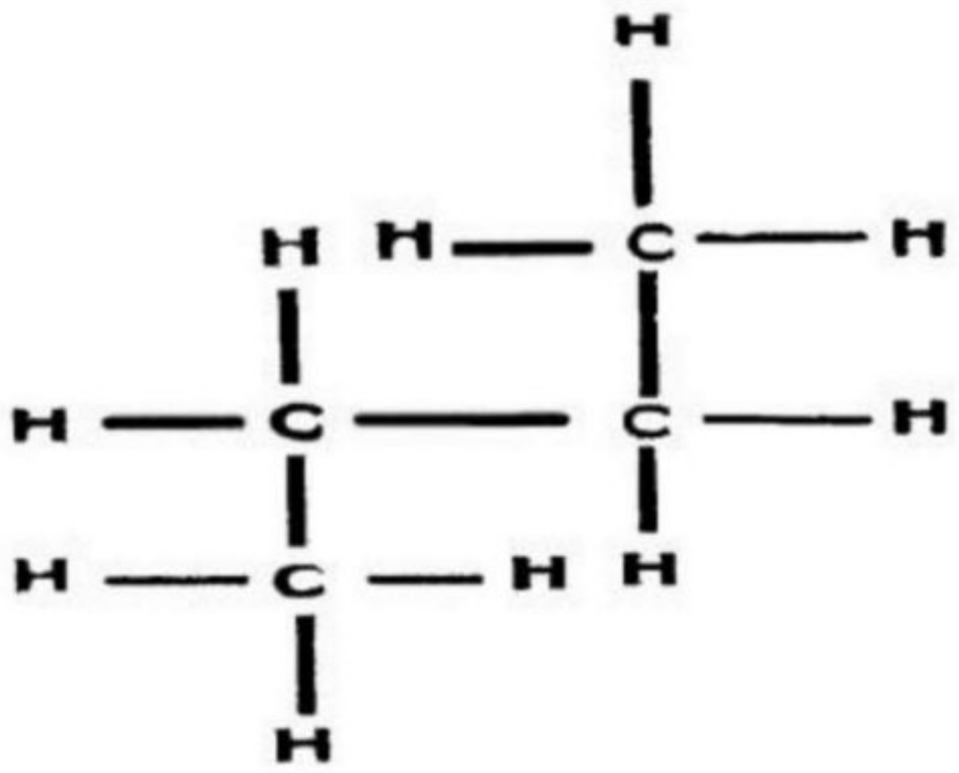

B. Electrolysis

C. Metallic Conductor

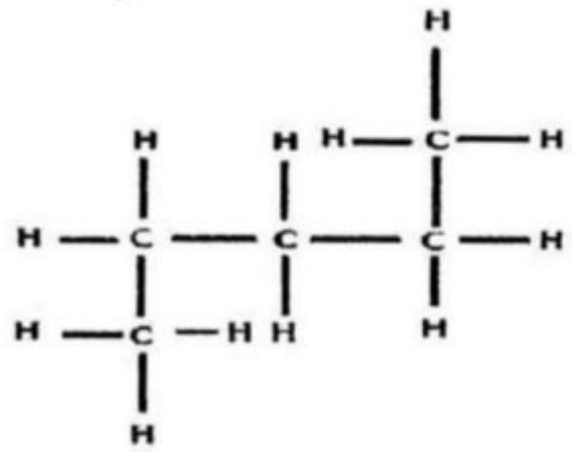

D. None of the above

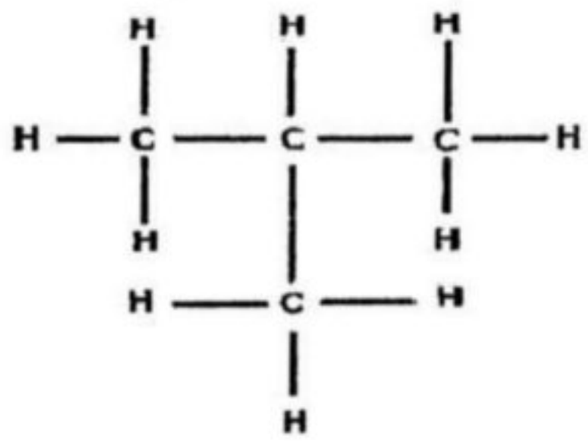

43. The molecular structure of a hydrocarbon is shown below.

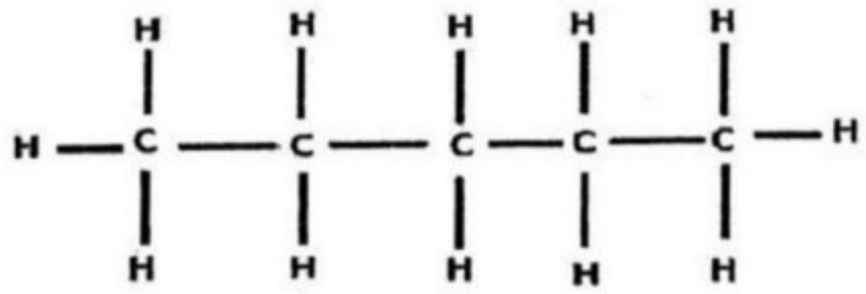

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000-2023

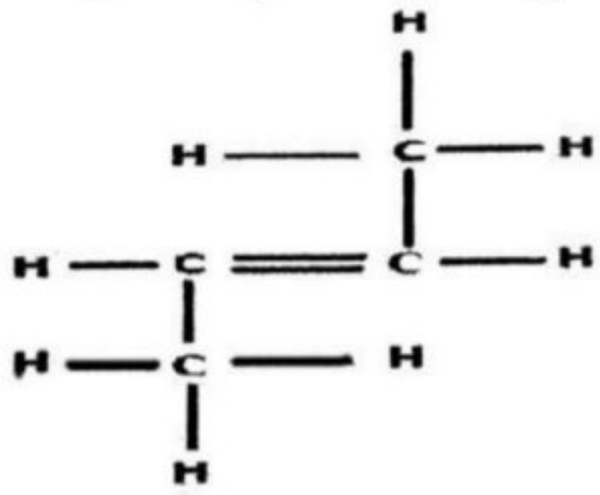

Which structure is an isomer of this hydrocarbon?

A.

B.

C.

D.

A. A
B. B
C. C
D. D

44. The formula of Plaster of Paris is:

A. $(CaSO4).1/2H_2O$
B. $(CaSO4).5H_2O$
C. $(CaSO4).7H_2O$
D. $(CaSO4).9H_2O$

45. Ionic, covalent and co-ordinate covalent bonds are simultaneously present in the molecular geometry of:

A. Ammonia
B. Ammonium hydroxide
C. Hydrochloric acid
D. Water
E. Methane

46. All amino acids contain the functional group.

A. NH2
B. CO2H
C. S2-
D. Both A and B

47. Alanine, lysine and tryptophane are:

A. Carbohydrates
B. Lipids
C. Enzymes
D. Amino acids

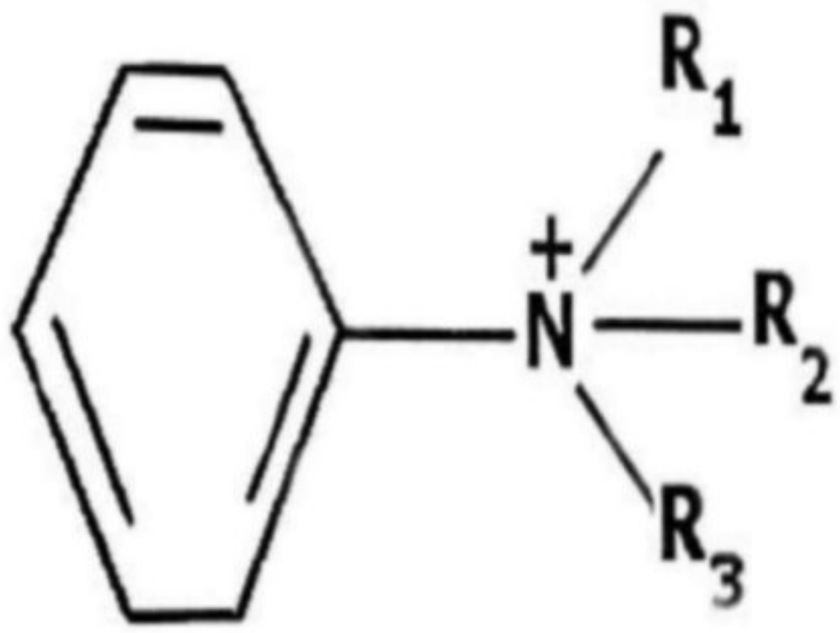

48. What happens when one mole of ethane is mixed in the dark at room temperature with six moles of chlorine?

A. There is no reaction.
B. $CH3CH_2Cl$ and HCl are formed.
C. CH3CCl3 and HCl are formed.
D. CCl3CCl3 and HCl are formed.
E. Carbon and HCl are formed.

49. How would an ammonium group affect on benzene ring for subsequent reactions?

MCAT Papers TESTING SERVICE 2009–2023

Medicoengineer.com

A. deactivate the ring; meta directing
B. activate the ring, ortho-para directing
C. deactivate the ring; ortho-para directing
D. activate the ring; meta directing

50. Which of the following would be the best solvent for an SN2 reaction?
A. H2O
B. CH3CH2OH
C. CH3SOCH3
D. CH3CH2CH2CH2CH2CH3

51. A correct formula must:
A. be balanced with proper coefficient
B. always have subscripts
C. always confirm to the valency rules
D. always confirms to the law of multiple proportions

52. A compound was found to contain nitrogen and oxygen in the ratio 28g : 80g.
The formula of the compound is:
A. NO
B. N2O3
C. N2O4
D. N2O5

53. When β-particles are sent through a thin metal foil, most of them go straight through the foil as:
A. β-particles are much heavier than electrons
B. β-particles are positively charged
C. Most part of the atom is empty space
D. β-particles move with high velocity

54. Electronic Configuration of M2+ ion is 2, 8, 14 and its atomic weight is 56
amu. The number of neutrons in its nucleus are:
A.30
B. 32
C. 42
D. 52

55. The quantum numbers +1/2 and -1/2 for the electron spin represent:
A. Rotation of the electron in clockwise and anticlockwise direction respectively
B. Rotation of the electron in anticlockwise and clockwise direction respectively
C. Magnetic movement of the electron pointing up and down respectively
D. Two quantum mechanical spin states which have no classical analogue

56. 1 liter of a gas weighs 2g at 300 K and 1 atm pressure. If the pressure is made 75 atm, at which of the following temperatures will 1 L of the same gas weigh 1g?
A. 450 K
B. 800 K
C. 600 K
D. 900 K

57. Which of the following pairs of gases has same rate of diffusion?
A. CO_2 and N2O

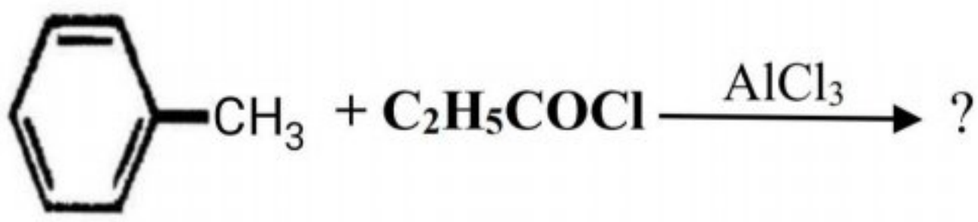

MDCAT Past Papers
PRESTIGIOUS TESTING SERVICE
2000-2023

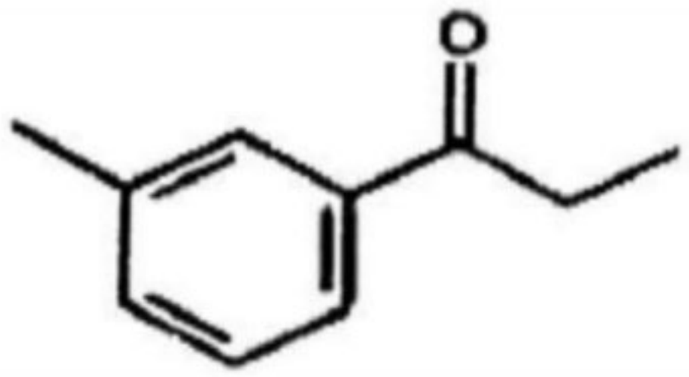

B. CO_2 and CO
C. NO_2 and CO_2
D. CO_2 and N_2O_4

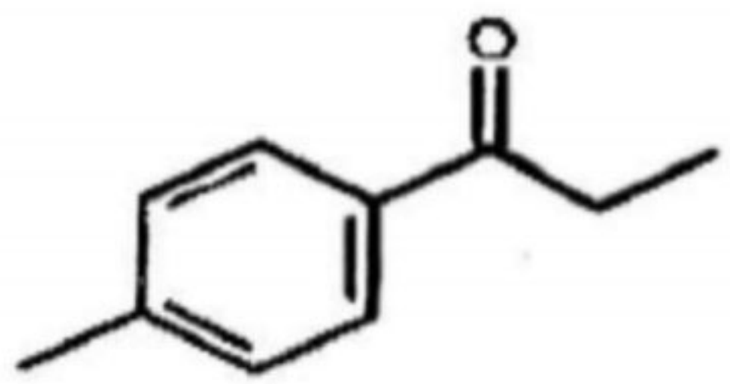

58. For the equilibrium reaction $2NO_2 \leftrightarrow N_2O_4(g)$ +61 kJ, increase of temperature would:
A. Favour the formation of N_2O_4
B. Favour the decomposition of N_2O_4
C. No effect on equilibrium
D. Stop the reaction

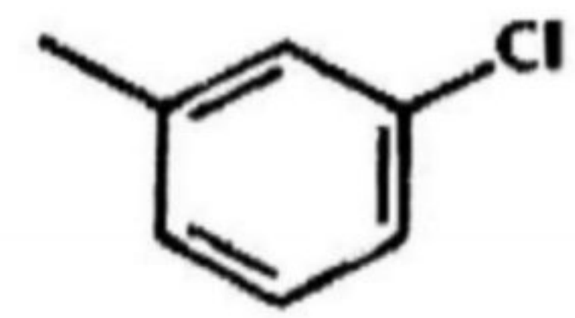

59. The value K for $H_2(g) + CO_2(g) \leftrightarrow H_2O(g) + CO(g)$ is 1.80 at 1000°C. If 1.0 mole of each H_2 and CO_2 are place in 1 litre flask, the final equilibrium concentration of CO at 1000°C will be:
A. 0.295 M
B. 0.385 M
C. 0.531 M
D. 0.473 M

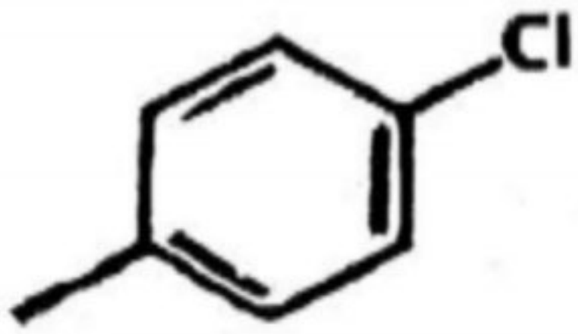

60. What would be the major product of the following reaction?

A.

B.

C.

D.

PHYSICS

61. A fixed mass of an ideal gas absorbs 1000 J of heat and expands under a constant pressure of 20 kPa from a volume of 25×10^{-3} m^3 to a volume of 50×10^{-3} m^3.What is the change in internal energy of the gas?
A. -1000J
B. -900 J
C. Zero
D. +500J
E. +1000 J

62. In an experiment, an object was placed on the principal axis of a convex lens 25 centimeters away from the lens. A real image 4 times the size of the

MDC Post UTME TESTING SERVICE 2025–2026

object was obtaineD. The focal length of the lens is:

A. 20cm

B. 25cm

C. 33cm

D. 50cm

D. 100cm

63. An object with constant mass rests on a horizontal surface whose coefficient of friction is 0.2. If a horizontal force F is applied to the object, what will be the effect(s) on the object?

I. It may move with constant speed in the direction of F once it has been set in motion.

II. It may remain at rest.

III. It may accelerate.

IV. It may move with constant speed in a direction opposite to F.

A. I, II and III only

B. I and III only

C. II and IV only

D. IV only

E. III only

64. A person having a mass of 60 kilograms exerts a horizontal force of 200 newtons in pushing a 90 kilogram object a distance of 6 meters along a horizontal floor. He does this at constant velocity in 3 seconds. The weight of this person is approximately, in newtons: (g=9.8m/s²)

A. 40

B. 90

C. 200

D. 400

E. 600

65. If 500 cm³ of gas, having a pressure of 760 millimeters of mercury, is compressed into a volume of 300cm³ the temperature remaining constant, the pressure of the gas will be, in millimeters of mercury, approximately:

A. 500

B. 900

C. 1,100

D. 1,270

E. 1,500

66. Two springs fixed at one end are stretched by 5 cm and 10 cm, respectively, when masses 0.5 kg and 1 kg are suspended at their lower ends. When displaced slightly from their mean positions and released, they will oscillate with time periods in the ratio:

A. 1: √2

B. 1 : 2

C. √2 : 1

D. 2 : 1

E. 2 : √2

67. A unit _____ of induction is said to exist at a point where the force per unit charge experienced by a positive test charge, moving with a velocity of 1ms-¹ in the direction perpendicular to the field is 1 Newton.

A. Gravitational Field

B. Magnetic field

C. Magnetic flux

D. Flux density

68. A _____ is a positively charged particle with properties similar to the α-particle. Its mass is one fourth and charge is one half of that of an α-particle. It is smaller in size and carries less energy at the same velocity.

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000-2023
Medicoengineer.com

A. Beta particle
B. Gamma ray
C. Neutron
D. Proton

69. _____is defined as the sensation that sound produces in the ear of a listener
and is clearly related to the frequency of sounD. Frequency and _____ are both measured in Hertz (Hz). Thus greater the frequency the greater the _____ and lower the frequency lower the _____.
A. Quality... Pitch... Loudness... Pitch
B. Pitch... Pitch... Pitch... Pitch
C. Loudness... Quality... Pitch... Quality
D. Quality... Quality... Quality... Quality
E. Loudness... Loudness... Loudness... Loudness

70. Light can be polarized by:
I. Reflection
II. Double refraction
III. Scattering of light
A. I only
B. II only
C. III only
D. I and II only
E. I, II and III

71. Incident rays of light parallel to the principal axis of a convex lens, after refraction by the lens, will:
A. converge at the principal focus
B. converge inside the principal focus
C. Converge outside the principal focus
D. Converge at the center of curvature
E. Diverge as long as they are close to the lens

72. If two sounds have the same wavelength in air at the same temperature,
what other property must they also have in common?
I. Intensity
II. Amplitude
III. Frequency
A. I only
B. III only
C. I and II only
D. II and III only
E. I, II and III only

73. Which unit expresses work per unit charge?
A. Hertz
B. Watt
C. Joule
D. Volt
E. Half life

74. The time of one vibration of a simple pendulum may be decreased by:
A. Increasing the length of the pendulum
B. Decreasing the length of the pendulum
C. Using a heavier bob
D. Using a lighter bob

75. The sum of all forms of molecular energies in a thermodynamic system is known as:
A. Entropy
B. Enthalpy
C. Internal energy
D. Red shift

76. _____is also known as anti-electron.
A. Photon
B. Proton
C. Positron

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000–2023

D. Nucleon

77. When describing the isotopes of the same element, the most accurate statement is that they have:

A. The same spin

B. The same atomic mass but different atomic numbers

C. The same atomic number but different atomic masses

D. The same chemical properties and therefore can not be separated

E. A coexistence limit, that is, no element can have more than three isotopes

78. In Nuclear reactions, we have the conservation of:

A. Mass only

B. Energy only

C. Momentum only

D. Mass, energy and momentum

79. The lightest element which exhibits radioactivity is:

A. Hydrogen

B. Deuteron

C. Tritium

D. Helium

80. Nucleus with an excess of neutrons may decay radioactivity with the emission of:

A. A neutron

B. A proton

C. An electron

D. A positron

81. Which pair includes a vector quantity and a scalar quantity respectively?

A. Power, speed

B. Work, potential energy

C. Displacement, acceleration

D. Force, kinetic energy

82. A ball falls vertically and bounces on the grounD. The following statements are about the forces acting while the ball is in contact with the ground. Which statement is correct?

A. The force that the ball exerts on the ground is always equal to the weight of the ball.

B. The force that the ball exerts on the ground is always equal in magnitude and opposite in direction to the force the ground exerts on the ball.

C. The force that the ball exerts on the ground is always greater than the weight of the ball.

D. The weight of the ball is always equal and opposite to the force that the ground exerts on the ball.

83. A car is travelling with uniform acceleration along a straight roaD. The road has marker posts every 100 m. When the car passes one post, it has a speed of 10 m/s and when it passes the next one, its speed is 20 m/s. What is car's acceleration?

A. 0.67 m/s^2

B. 1.5 m/s^2

C. 2.5 m/s^2

D. 6.0 m/s^2

84. A sample of an ideal gas may:
I. expand adiabatically, or
II. expand isothermally
The net flow of heat into the gas from the exterior is:

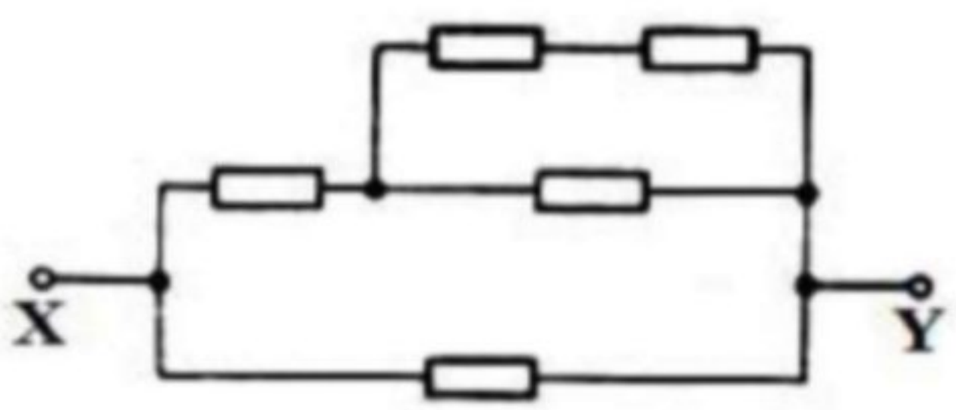

MDCAT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000-2023

A. Positive in each case
B. Negative for I and positive for II
C. Positive for I and negative for II
D. zero in each case
E. Zero in I and positive for II

85. With the usual notation, the first law of thermodynamics applied to one mole of an ideal gas can be written in the following form:
$C_v\Delta T = \Delta Q - p\Delta V$
In a change for which Boyle's law is obeyed, which of the following would necessarily be zero?
A. Cv
B. ΔT
C. P
D. ΔQ
E. ΔV

86. Four particles independently move at the same speed in a direction perpendicular to the same magnetic fielD. Which particle is deflected the most?
A. A copper ion
B. A helium nucleus
C. An electron
D. A proton

87. The circuit diagram shows a network of resistors each of resistance R. What is the effective resistance between the points X and Y?

A. 2R/7
B. R/2
C. 5R/8
D. 2R/3
E. 3R/4

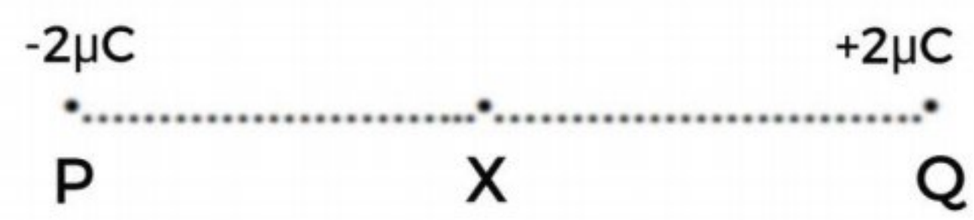

88. A row of 25 decorative lights, connected in series, is connected to a main transformer. When the supply is switched on, the lights do not work. The owner uses a voltmeter to test the circuit. When the voltmeter is connected across the third bulb in the row, a reading of zero is obtaineD. Which of the following cannot be the only fault in the circuit?
A. The filament of one of the other bulbs has broken
B. The filament of the third bulb has broken.
C. The fuse in the mains transformer has blown.
D. There is a break in the wire from the supply to the transformer.

89. A fixed mass of gas in a thermally insulated container is compresseD. After compression, the temperature of the gas will have:
A. Fallen, since more molecules bombarded the container and so they must be moving slower
B. Fallen, since more molecules collide more frequently with one another and so their average speed is lower
C. Remained constant if the compression is very slow
D. Risen, since doing work on the gas increases the kinetic energy of the molecules.

MDCAT Past Papers BY PRESTIGIOUS TESTING SERVICE 2000-2023

E. Risen, since there are more intermolecular collisions and so more heat is produced
by them

90. Charges of +2 μC and -2 μC are situated at points P and Q respectively, asshown below. X is midway between P and Q.

Which of the following correctly describes the electric field and the electric potential at point X?

	Electric field	Electric potential
A.	Towards Q	zero
B.	Towards Q	negative
C.	Towards P	zero
D.	Towards P	positive

ENGLISH

91. Question 91-92:
Complete the sentences by choosing the most appropriate option, from the given lettered choices (A to D) below each.
Some people_____ claim to be vegetarians actually allow themselves to eat
fish and chicken
A. Which
B. Whom
C. Who
D. Why

92. There _____many students waiting to hear the results of the test.
A. Has
B. Have
C. Was
D. Are

93. Question 93-94:
Identify the word or phrase that needs to be changed for the sentence to be correct:
Because of their identical appearance and dress, the twins were
often mistaken for each other.
A. Because
B. Identical
C. And dress
D. Were
E. No error

94. During the day, there is often two guards at the entrance.
A. During
B. There is
C. Guards
D. Entrance
E. No error

95. Question 95-96:
Choose the word most similar in meaning to the capitalized one.
THREATENING:
A. Flighty
B. Aggressive
C. Chaste
D. Hallowed
E. Global

96. PROVOKE:
A. Deface
B. Lionize
C. Remove
D. Punish
E. Aggravate

97. Question 97-98:
Choose the lettered word or phrase that is most nearly opposite in meaning to the word in capital letters.
HONESTY:
A. Clever
B. Dishonesty

WAEC CBT Past Papers
BY PRESTIGIOUS TESTING SERVICE
2000-2023

C. Resolution
D. Failure

98. MANDATORY:
A. Dispassionate
B. Obligatory
C. Voluntary
D. Confirmed
E. Unhappy

99. Question 99-100: Read the passage to answer.
Due to the extremely hot weather, the electric company is planning to turn off power in certain districts during the day. This will reduce the total demand for electricity and prevent a city-wide shutdown of electrical services. Power will not be out longer than two hours in your area. For further information, please visit our Web site at www dot electricity dot com. All areas affected by the shutdown are listed there, as well as the times that the power will be turned off in each area.
Why is power being turned off?
A. To reduce total demand
B. To save money
C. To make it cooler
D. To make the city pay its bill

100. How long will power be off?
A. Longer than two hours.
B. Less than two hours.
C. For one day.
D. Until the weather changes.
